DESIGN

**PORTFOLIO**  
2025

# Viva Polish Design!

We are immensely proud to announce that our **Mono** product family has been awarded the **Gold IF Design Award**, standing out among **11,000** submissions. This year, only **79** projects across all categories were granted the gold awards! This is a tremendous accolade for our work and every Ciarko employee! **Thank you to each and every one of you!**

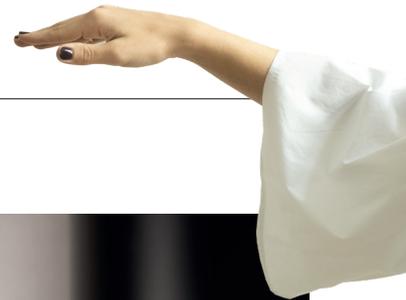

## Award for Simple, Too!

Among thousands of submissions from around the world, **Simple** stood out with its unique design and innovative technological solutions, gaining jury recognition. This great achievement underscores our commitment to **excellence and the passion** we bring to designing our products. This recognition is also a testament to the **hard work and talent of our team!**

## IF Gold Statement on the Mono Family:

„The **Mono** series of kitchen hoods by **Ciarko Design** exemplifies the balance **between aesthetics** and usability, which is highly sought after but rarely achieved in kitchen design. The icing on the cake is the **touchless gesture control system**, adding a bit of magic to an already intriguing project. **Bravo, Ciarko!**”

This success is not only that of our company but primarily of our **employees and partners** who contribute to our achievements every day. We are proud to celebrate this moment together and look forward to the future with optimism, creating products that combine **beauty, innovation, and functionality.**

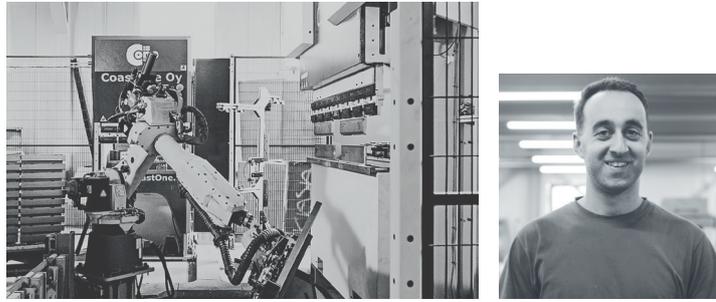

## For over 39 years, we have been a market leader, continuously surprising with innovative solutions!

We proudly design exclusively **in Poland**. We manufacture **3,500** cooker hoods per day, utilizing more than **20,000** square meters of production space. Our annual production exceeds **1,000,000** hoods. All hoods are fully designed and manufactured by our team of over **600** employees.

**Ciarko** is a **family company** not only because of its founder. Throughout the organization, more than **100 families** help create the **Ciarko** brand **every day**, ensuring the unquestionable quality of our products. From the very beginning, the company's mission has been sustainable development and environmental protection.

This year, the company will make an investment in renewable energy that will reduce the consumption of electricity produced during operation, **up to 80%!**

The brand's products have been **appreciated in 48 markets worldwide**, and technologies (among other things, gesture-controlled hood, air ventilation function) allow to improve the quality of time spent in the kitchen for millions of people around the world every year!

## We always look to the future!

The company's mission is to strengthen Polish technological innovation through cooperation with technological institutes and the Warsaw University of Technology. In 2021, the cooperation of a team of designers of **Ciarko** and scientists resulted in the creation of one of the **quietest BLDC engines** on the market.

**Robotisation rate** of the plant at 112 (the average for Poland is 52) allowed to optimise production processes but at the same time did not lead to the loss of high production flexibility. It has allowed us to combine modern technical and IT solutions with a traditional craftsman's approach, focusing on a love for fine details.

The company also invests in product design and establishes co-working relationships with Polish applied designers, for which it receives numerous awards including the „Oscar” of industrial design **Red Dot Design Award**. Number of projects and collaborations with young designers continues to grow year after year, and their projects are nominated for awards around the world.

That's what  
makes us  
special!

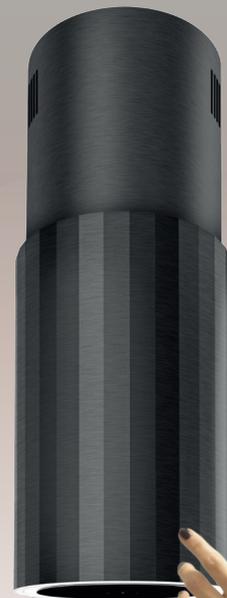

**DESIGN** award-winning  
internationally.

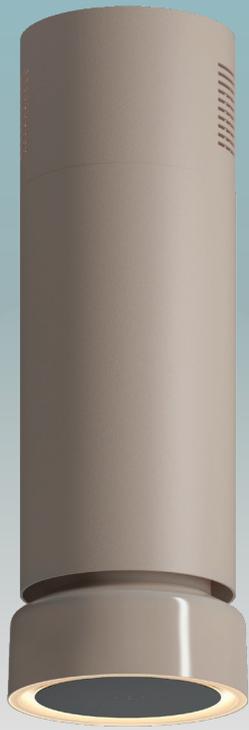

**Warm2Cold LED** -  
adjustable lighting colour  
(2900 K - 6000 K).

**COLOR SOLUTIONS LOVED**  
by architects.

**ANTIFINGER PRINT**  
Perfectly smooth surface re-  
sistant to scratches and im-  
prints.

---

Quiet, brushless and energy-efficient **BLDC** engine.

---

**GESTURE CONTROL**  
or remote control.

---

Possibility of **LOW HANGING** above the induction hob - min. 45 cm.

---

**HANDCRAFTED IN EU**  
production in Poland, Sanok.

# innovative hood control system

MANUFACTURED  
IN POLAND

## Gesture Control

Controlling the hood without touching the appliance, exclusively with the movements of our hands, is becoming a reality today. With a **simple gesture**, you can turn the device on or off, or change its settings for power or illumination. It's all thanks to hand motion sensors that make the previously intuitive hardware even more functional.

From now on, its operation does not mean that we have to interrupt an activity just to turn on the hood. To use it, we no longer have to wipe our hands or worry about getting the control panel dirty. Isn't that simplicity at your fingertips?

Keeping the hood clean and controlling its operation has never been easier:

**1**

By holding your hand in front of the hood for about 2 sec, **you will turn on the lighting.**

**2**

Move your hand from left to right **to change the speed mode to a higher one.**

**3**

Shift to a lower gear by moving your hand from right to left and stop for about 2 seconds **to turn off the lights.**

WALL MOUNTED HOOD

**A new design!**

- LED Warm2Cold Lighting** – Adjustable lighting color from warm (2900K) to cool (6000K) and three brightness levels to choose from.
- GestureControl** – Hands-free control of the cooker hood's power and lighting using simple hand gestures.
- BLDC Motor** – Ensures quiet operation and energy efficiency (8W power consumption).
- Anti-Fingerprint Coating** – A smooth, satin-finished surface that resists smudges and fingerprints.
- Flexible Installation** – Can be installed as low as 45 cm above an induction cooktop.
- Cook Assist** – Automatic synchronization between the cooker hood and the induction cooktop for seamless operation.
- Ribbed Surface** – Unique, precision-engineered texture for a distinctive look.
- Perimeter Extraction** – Air suction technology that pulls air efficiently from across the entire surface of the hood for optimal airflow.
- AdaptFlow** – Smart software that optimizes airflow in absorption mode for better performance and efficiency.

| cold, warm, warmer!

## Warm2ColdLED

If you hesitate whether to choose a warm or cool light colour together with Ciarko you can resolve this dilemma once and for all. **Warm2ColdLED** technology gives us the option to adjust the light colour from **2900K** to **6000K**. Warm light, close to sunlight, does not tire the eyes, improving our well-being; while cooler light allows us to expose details and emphasizes the character of the interior. In addition to endless possibilities in kitchen design, **Warm2coldLED** has another advantage: it illuminates the workspace with minimal power consumption. And this is true regardless of the time of day or the weather conditions outside the window.

connection  
that makes  
cooking easier

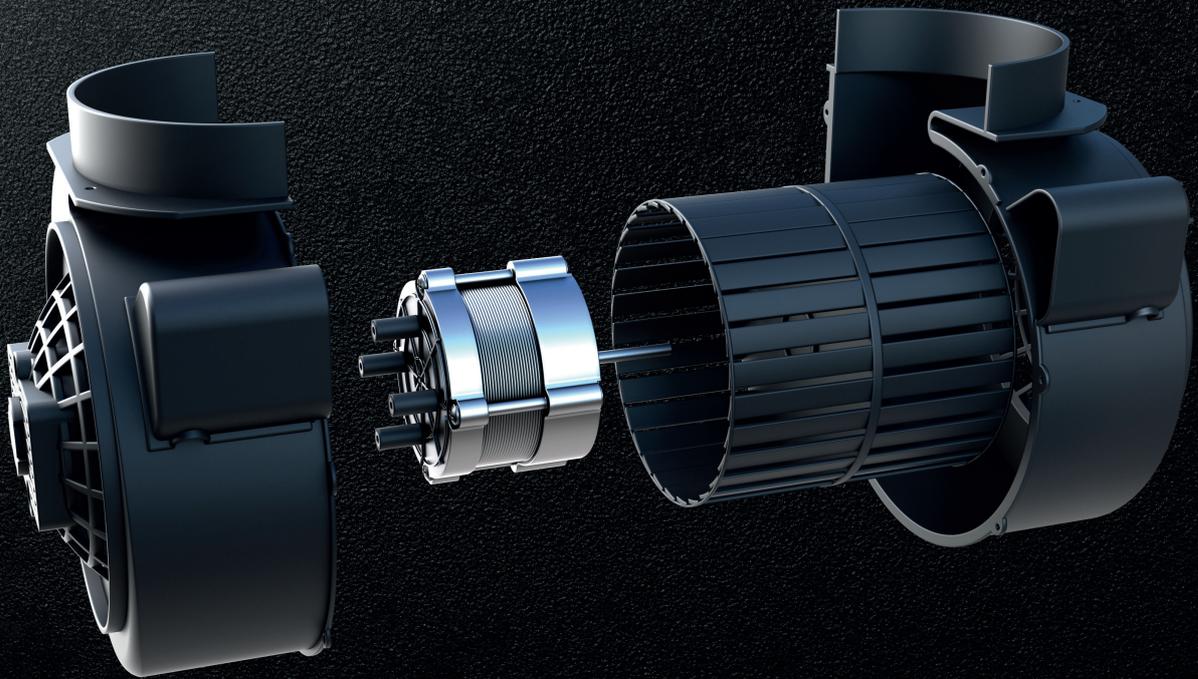

## Cook Assist

With the **automatic synchronization** of the hood with the induction cooktop, your kitchen becomes **smarter!** The hood will automatically adjust to the intensity of cooking on the induction cooktop, providing the cleanliness and freshness you need.\*

# I noiseless and **energy-saving**

 **MANUFACTURED  
IN POLAND**

Energy efficiency hidden in the engine  
**Polish thought has power!**

What do we look for when buying a kitchen hood? Reliable studies show that primarily on the volume and performance of the equipment. Knowing these needs and with many years of experience behind us, we have products to offer, ideally matching the features you are looking for. It was in the Ciarko Design and Minimal hood lines that the high quality offered by the technology developed by Ciarko and the knowledge of engineers from the Warsaw University of Technology who worked on the heart of the hood, i.e. the **BLDC engine**. It is extremely quiet during operation, and also achieves an energy class of **A+++**, which **reduces energy consumption by up to 95%**. Its operation in the first gear, when it needs only **8 W**, can be compared to the energy consumed by a single **small light bulb**. Thanks to the innovative housing, we can reduce the noise level of the hood during operation by as much as **6 dB!** What does this mean in practice? Among other things, the fact that it will not interfere with our conversations, and this is a huge advantage that is becoming our standard. **Ciarko was one of the first brands on the market to lower the volume level of hoods below 40 dB.**

# | Quiet kitchen **VILPE**<sup>®</sup>

**VILPE<sup>®</sup>**  
roof fan

**Quiet kitchen VILPE<sup>®</sup>** is a Scandinavian ventilation system - a kitchen hood combined with a roof fan.

In the proprietary solution, **the functions of the traditional motor, operating in the hood above our head, are taken over by the roof fan motor.** This system, in addition to its high efficiency, **allows us to completely minimize the noise level** generated by the operation of a traditional hood. That is why it fully deserves its name.

## Recommended models of roof fans:

- VILPE<sup>®</sup> Eco 125 Flow**      max capacity approx. **650 m<sup>3</sup>/h\***
- VILPE<sup>®</sup> Eco 160 Flow**      max capacity approx. **900 m<sup>3</sup>/h\***
- VILPE<sup>®</sup> Eco 200 Flow**      max capacity approx. **1300 m<sup>3</sup>/h\***

\*Oriented capacities for the highest motor speed (for a pressure drop of 50 Pa, which corresponds to the example length of the ventilation duct between the eave and the fan on the roof about 5 mb)

Models for mounting in the roof slope or on the chimney

## Sample performance comparison:

Quiet kitchen	Volume operation*	Kitchen with a traditional chimney hood
0-10 dB	level 1	39 dB
0-20 dB	level 2	46 dB
0-30 dB	level 3	56 dB
10-40 dB	level 4	69 dB
<b>750 m<sup>3</sup>/h</b>	<b>Boost mode</b>	<b>670 m<sup>3</sup>/h</b>

# | Quiet kitchen

**OUT motor** from Ciarko Design -  
maximum efficiency: **900 m<sup>3</sup>/h**

OUT motor from Ciarko Design is a solution, which **allows for a significant reduction of noise in the kitchen and increases the efficiency of the ventilation system.** Thanks to the possibility of installation in the attic or utility room, **the device operates discreetly, providing acoustic comfort** in the cooking area.

The motor can be moved up to 7 meters away from the hood, which gives greater freedom of arrangement and allows for optimal placement of ventilation system components.

Compatibility with models:

- Monogram W OUT
- Tubus W OUT
- Roto W OUT

**With this solution, the kitchen becomes a place of silence and harmony, without compromising on effective air filtration.**

**Kit for mounting motor outdoors for hoods: Monogram W OUT, Tubus W OUT, Roto W OUT,**

**Ask your dealer about other models.**

MODEL INTEGRATED WITH INDUCTION HOB

## Hood and induction cooktop in one appliance!

**Drip Control** - An innovative system designed for easy collection and removal of spilled liquids.

**Automatic hood operation** - The range hood's power, on/off, and extraction strength are controlled automatically. You can switch to manual mode at any time.

**Two Bridge Zones** - The induction cooktop is equipped with a function that splits and combines cooking zones, allowing for even heating of large or irregularly shaped pots.

**Boost** - This function allows you to increase the power to maximum with a single button, reducing cooking time to a minimum.

**Cooking Programs** - Choose from three temperature levels: 44°C, 70°C, and 94°C. Quickly and conveniently adjust the temperature to suit the dish you're preparing.

**Timer** - Set the cooking time for each cooking zone individually.

**Pan Detection** - The system automatically detects the pan and allows the heating zones to be activated.

**Odor-Free** - The metal construction and stainless steel chamber of the range hood do not retain odors.

**Customize to your needs** - You decide whether the air outlet is installed at the front or back of the cabinet. The Wizard hood is available both as an extractor or a recirculator with carbon filters.

**SpaceMax Wizard** - Compatible with the special SpaceMax Wizard air duct.

**Flush installation with the countertop** - The cooktop can be fully integrated into the countertop.

**Heating zone size:** 4x 220 x 185 mm.

**Boost** - This function allows you to increase the power to maximum with a single button, reducing cooking time to a minimum.

**Cooking Programs** - Quickly and conveniently adjust the temperature to suit

**Odor-Free** - The metal construction and stainless steel chamber of the range hood do not retain odors.

**Customize to your needs** - You decide whether the air outlet is installed at the front or back of the cabinet. The Wizard hood is available both as an extractor or a recirculator with carbon filters.

**SpaceMax Wizard** - Compatible with the special SpaceMax Wizard air duct.

**Flush installation with the countertop** - The cooktop can be fully integrated into the countertop.

**Heating zone size:** 4x ø 180 mm.

ADDITIONAL GRILLE OPTIONS AVAILABLE AS ACCESSORIES

POWER:  
7360 W

H X W X D:  
241 x 600/720 x 515 mm

NOISE LEVEL:  
36-59 (69) dB

PERFORMANCE:  
550 m3/h

## Long Life filters included

# Moondraft

COUNTERTOP HOOD

## A new dimension of minimalism

**BLDC Motor** - Ensures quiet operation (from 38 dB) and energy efficiency (8W power consumption).

**Optional Motor Kit** - The optional motor kit allows you to conveniently reposition the motor up to 8 meters away to a location of your choice.

**50 cm extendable Hood** - Extends up to 50 cm, making it easier to use with large pots and pans.

**Mounting flush with the countertop** - Moondraft cooker hood can be mounted flush with the countertop, which protects the glass from possible damage and helps maintain cleanliness.

## External motor option available

COLOUR:

H X W X D:  
724-500 x 600 x 333 mm  
724-500 x 898 x 374 mm

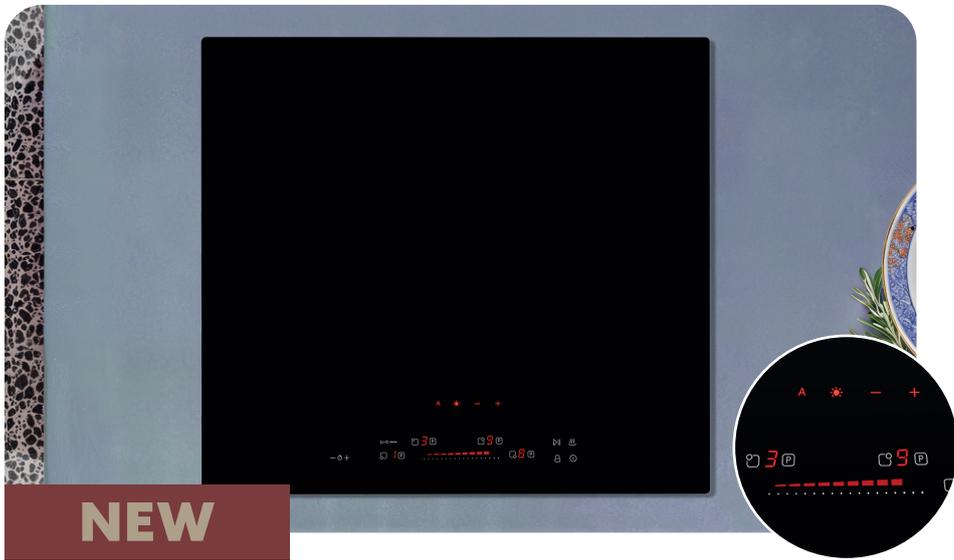

NOISE LEVEL:  
51-65 (69) dB

# CulinaSync Advanced

INDUCTION HOB

**When elegance meets functionality!**

H X W X D:  
65 × 600 × 515 mm

POWER:  
7200 W

**NEW**

**Mounting flush with the countertop** You can completely flush the plate with the countertop.

**Slider** Get full control of your cooktop with a convenient slider that lets you easily adjust the cooking fields. It's the way to cook at the touch of a finger.

**Cook Assist** provides a wireless connection between the hob and the hood. Simply start cooking and the hood will automatically adjust its settings based on the options you select on the hob. Concentrate only on cooking.

A dedicated **Timer** on each field allows you to precisely control the cooking time, making meal preparation much easier.

**Bridge** in an induction cooktop allows you to combine two heating fields into one large cooking surface. With automatic synchronization of temperature and time settings, it is ideal for using grill plates and bakeware.

Activate **Boost** to increase the heating power. This is the ideal solution to cook food even faster.

# CulinaSync Ultimate

INDUCTION HOB

**Technology that is changing Cooking!**

H X W X D:  
56 × 775 × 520 mm

POWER:  
7200 W

**NEW**

**A 5-field plate** means even more room for new culinary ideas. Let nothing limit your culinary enthusiasm anymore!

**Mounting flush with the countertop** You can completely flush the plate with the countertop.

**Automatic cooking programs.** The hob has 3 automatic functions: defrost, keep warm and reheat function.

**Touchscreen display.** Get full control over your cooktop with the color touchscreen display. It provides real-time information about the operation of the cooking fields and allows you to adjust their settings accordingly.

**Cook Assist** provides a wireless connection between the hob and the hood. Simply start cooking and the hood will automatically adjust its settings based on the options you select on the hob. Concentrate only on cooking.

A dedicated **Timer** on each field allows you to precisely control the cooking time, making meal preparation much easier.

**Bridge** in an induction cooktop allows you to combine two heating fields into one large cooking surface. With automatic synchronization of temperature and time settings, it is ideal for using grill plates and bakeware.

Activate **Boost** to increase the heating power. This is the ideal solution to cook food even faster.
