Brandt

EDITORIAL

Brandt always places people at the heart of its expertise.
That is why we designed adapted appliances, whose only goal is:

Facilitate everyday life.

We have developed simple and ingenious technologies that meet all needs:
whether on a daily basis or on special occasions.

Simply because the **Brandt** appliances are designed by **men**.

Brand

A historical brand, Brandt is a generalist trademark and is a strong presence in all families of products in the fields of Washing, Cooking, Cooling, Small Appliances. Since its launch, the Brandt brand mission has been simple: support consumers for their entire lives by providing innovative, useful and relevant products. Making daily life easier by providing adapted equipment is then written into the brand's DNA. A pioneer of its innovations, Brandt has set itself apart from the competition by being a technological leader with automatic variable ability or automatic laundry detergents dispensing... for example. Whether in the field of Washing, Cooking or Cooling, many of Brandt's products have been at the top of the sales charts and will have continued impact on current and future generations.

History

LEGACY

Brandt is named after Edgar Brandt, a leading wrought iron craftsman from the beginning of the 20th century. Initially a locksmith and metalwork business, he created famous works, including bronze slab of the Unknown Soldier Monument in 1921, located in the middle of the Arc de Triomphe. The firm made a move into household appliances in the 1950s. This is how the company started to invent its first washing machines, refrigerators and ironing presses. In June 1956, Edgar Brandt offers to the Château de Versailles in Paris, the two beautiful gilded gates of the Great Court of Ambassadors, destroyed during the Revolution.

INNOVATION

Brandt is a ceaseless innovator, aiming to make household appliances accessible to all.

1949

First manual top-loading washing machine with agitator.

1967

The top refrigerator brand in France.

1969

The 1st French dishwasher is released from the Brandt factories.

1970

First variable-speed and automatic variable capacity washing.

1985

Launch of the 1st built-in appliances collection.

1990

1st induction hob.

2007

Launch of small appliances. Blenders, kitchen machine, kettles.

2008

Dose-e, first top-loading washing machine with dispenser and built-in detergent measure.

2010

Induction hob MAXIZONE. The 1st 40 x 23 cm. "maximum capacity" cooking area.

2016

Intellect year! This new home appliances generation shows all innovations of the brand since its creation.

2021

Hygiène program removes more than 99.9% of bacteria and viruses, including COVID-19*.

* tested and approved by VirHealth Lyon.

HYGIÈNE

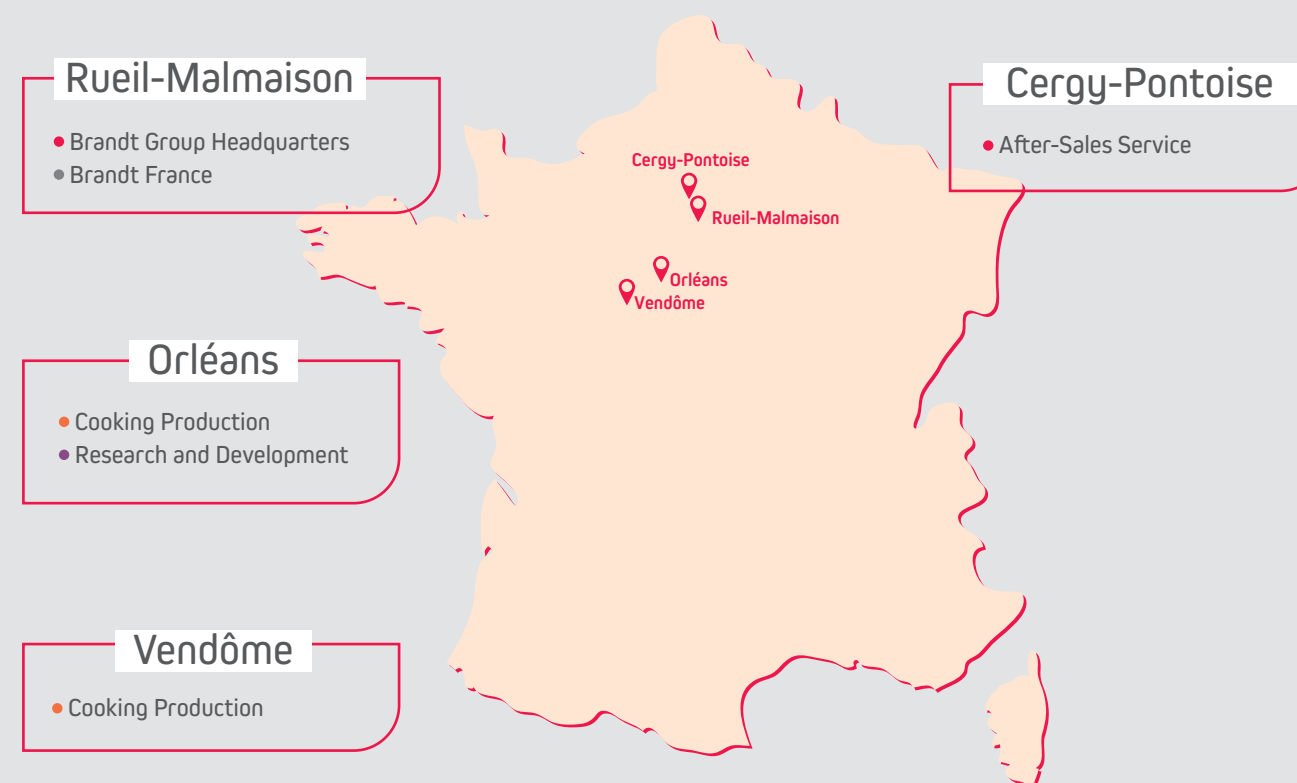

ORIGINE FRANCE

In the world of household appliances, Brandt is the last major player in the Large Household Appliances sector to design and manufacture cooking products in France. Its production is spread across the sites in Orléans (45) and Vendôme (41). The Orléans factory has a Research and Development department, and the After-Sales Service is located near Cergy-Pontoise (95).

Brandt, the labelled French household appliance

An integral part of French culinary heritage, the majority of our cooking appliances have been certified as "Origine France Garantie" since 2011. Conducted by an independent organization, the "Origine France Garantie" certification provides a clear and objective indication of origin. It serves as a marker of quality and excellence, guaranteeing the traceability of household appliances.

Made in France Design and Technology

This Brandt collection, developed and manufactured in France, is a testament to the company's expertise in combining aesthetics and functionality. Perfectly in tune with current technology and design trends, the collection has been expanded with new models featuring a touch-sensitive interface and a large TFT screen animated with beautiful photos to illustrate the pre-programmed modes and dishes, and is now available in Full Black for added elegance and refinement.

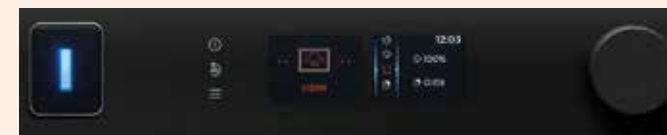

Culinary excellence in every mode*

Discover **true Fan assisted heat**: ideal for preparing different dishes simultaneously on 3 levels; pizzas or tarts have never been so delicious as with **Combined Heat**, this exclusive mode specially designed for "wet" cooking. The **Smart Assist** function is there to give you the support you need. According to the cooking mode chosen, the oven suggests not only the ideal temperature but also the adapted cook time. Thanks to the numerous recipes pre-programmed for automatic cooking on the **Cooking Guide** or **Steam Guide**, culinary success is guaranteed at every meal. And with the new **Steam Cooking** functions, you're guaranteed to save cooking time and improve nutritional quality!

New 3-in-1 pyrolysis oven BOR7586B More inspiration and flavour!

To no longer have to choose between different models and cooking modes, this oven has a **Multifunction Plus** for all your daily or festive menus, a **Combined Steam** mode for fluffy, golden and crispy dishes, and a **100% Steam** mode for healthy, dietetic dishes.

Maintenance in its purest form*!

Are you fussy about the cleanliness of your oven? With their smooth, highly resistant and easy-to-maintain interior enamel, ovens* are now available with new features in this area:

- **Steam cleaning by hydrolysis:**
simpler and more environmentally friendly!
- **Clean 39' and Pyro Express pyrolysis cleaning:**
faster and more economical!
- **Auto or Turbo Pyrolysis:**
tailor-made to your requirements!

*depending on model

New 3-in-1 oven A Brandt innovation for a concentrate of flavours

This pyrolysis combi oven will revolutionise your culinary world, offering Multi-Function Plus, Combi-Steam cooking and 100% Steam cooking... Discover its benefits.

- Its **11 Multifunction Plus positions** give you all the resources you need to prepare your daily or festive menus with flair.
- The **Combi-Steam mode**, combined with the Multifunction function, makes it possible to prepare soft, golden and crispy dishes at the same time.
- In **100% Steam mode**, you can cook healthily, without adding fat, while preserving the flavour of your food.

To successfully vary your daily pleasures and menus

Combi-cooking and 100% steam means multitude of intelligent cooking programmes to help you prepare your dishes and achieve remarkable culinary results that are healthy, dietetic and above all delicious.

In the **culinary guide**, you'll find 35 pre-programmed recipes for traditional and hot air cooking, 38 for combined steam cooking and 25 for 100% steam cooking.

Remarkable ease of use and comfort

So easy to use with its removable backlit **water tank**; opening and draining are automatic. Equipped with the **Soft close** system, the oven door, designed with 4 layers of glass, easy to clean during cooking and pyrolysis.

Its pyrolysis **cleaning system** adapts to your needs with nuance and efficiency.

- Using the residual heat from a previous cooking, the **Clean 39'** function neutralises odours between two cookings in 39 minutes;
- **Pyro Express** cleans the cavity in 59 minutes, saving 50% energy.
- In **Auto Pyrolysis mode**, leave it to your oven to automatically manage the time required according to the degree of soiling detected. In Turbo mode, your oven will be out of action for just two hours.

Ingenious cooking accessories

To assist you skillfully in the preparation of all your dishes, this combi oven provides a highly functional and complete set of equipment: an anti-tipping grid designed to safely extend from the oven, drip trays with depths of 20 and 45mm, featuring a front handle for easy handling, a stainless steel dish, and its support for flavorful steaming.

Perfection from every angle

Designed and manufactured in France, this Multifunction Plus oven is the result of the brand's latest technical advances and has been carefully through in terms of design and functionality.

- **Elegant combination of glass and steel**, total black look or enhanced with stainless steel.
- **Spacious 73-litre capacity**, with 6 levels of shelves for cooking a wide range of dishes.
- **Intuitive, innovative programming**: touch controls, colour graphic display with photos, automatic recipe guides and Smart Assist for guaranteed results.
- **Energy performance**: A+ in energy labelling

QuattroPulse

This muffle construction concept circulates hot air within the cavity at an increased speed, thereby ensuring an even distribution of heat. The temperature is uniform in 100% of the cavity to guarantee a quality and a perfect result at your cooking and all your dishes.

Autocook 12 recipes

It's so easy to become a cordon bleu! This programme automatically manages all the cooking parameters (temperature, cooking mode and cooking time). Select the type of dish, put it in the oven at the recommended level and enjoy once it's done.

A CLASS

Excellent insulation, controlled management of temperature cooking and energy savings: Brandt quality, Made in France.

Removable full glass inner door

It provides a large, flat surface that cleans easily with a wipe of a sponge. For greater convenience, you can also unclip the glass to clean it completely and make it shine like new.

Harmonious design and functionality

Solo or Combi microwaves, with or without grill, in small or large capacity... Brandt offers a wide collection designed to fit into standard niches and ensure a beautiful unity in all kitchen spaces. Their graphic lines and sleek control panels, with touch-sensitive controls or knobs, coordinate perfectly with those of the built-in ovens.

Electronics for greater precision

Brandt has chosen to equip all its models with an electronic programming mode. The touch-sensitive controls allow intuitive and precise adjustment and make cleaning very easy.

QUATRO PULSE

Thanks to a heat diffusion process - rapid injection of hot air and completely reworked holes - the temperature is uniform in 100% of the cavity to guarantee a quality and a perfect result at your cooking and all your dishes. (Only for BKC7154 and BMS7120 microwaves)

Combined grill and microwave to light up your dishes

The 100% grill function adds crispiness to your gratins, tarts, and pizzas. And in Combined Grill+Microwave mode, you can heat, brown and brown to perfection.

Space and a large turntable... a sense of comfort

All models (except 17 litre) have a maxi turntable (up to 36.6 cm in diameter) that can be disengaged to accommodate large square dishes, for example. The tray integrated into the base of the cavity makes it easy to place or remove dishes in complete safety.

The guarantee of a perfect result!

Automatic cooking function

Allows you to cook simply! Just select the type of food among the 8 proposed and input the weight. The microwave then automatically suggests the appropriate cooking mode and time.

Defrost function

Defrosts your food 6 times faster by calculating the ideal time according to the size and weight of the food. For example, four 100 g minced steaks will defrost in just 1 min 40 seconds!

Leading-edge expertise 100% French manufacturing

As a pioneer and expert in induction, Brandt is developing a new collection of hobs that are ever more stylish, functional and efficient.

The range has been extended to include 80 and 60 cm models, with a host of refined configurations based on a refined full-glass design and touch-sensitive controls dedicated to each cooking zone. Equipped with high-performance inductors, they combine unrivalled flexibility, heating power and modularity for infinite possibilities of use.

Flexibility and performance

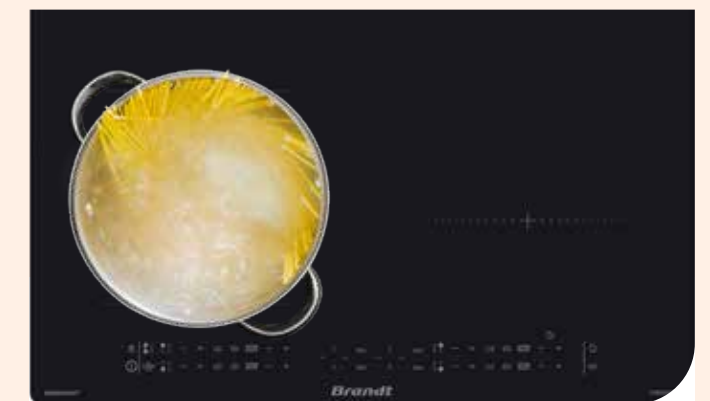

HoriZone and DuoZone: extraordinary cooking areas

What sets them apart is their ability to provide a modular space with one or two separate, autonomous zones. With a surface area of **40x23 cm for HoriZone** and **37x18 cm for Duozone**, they can be used to position a large oval casserole or a fish pan, or two conventional-sized utensils at the front and rear, either alone or simultaneously, by adjusting the power levels to suit each type of preparation.

10 safety features pack induction

Brandt induction hobs are perfectly safe and have all the required safety features to cook with total peace of mind. This pack includes Residual heat indicator, Small object detection, Protection against overflows, Auto-Stop system, Panel lock control, Automatic saucepan detection, Anti-overheating cookware, Low voltage, connection error and over tension detections + Cleaning clean Lock function .

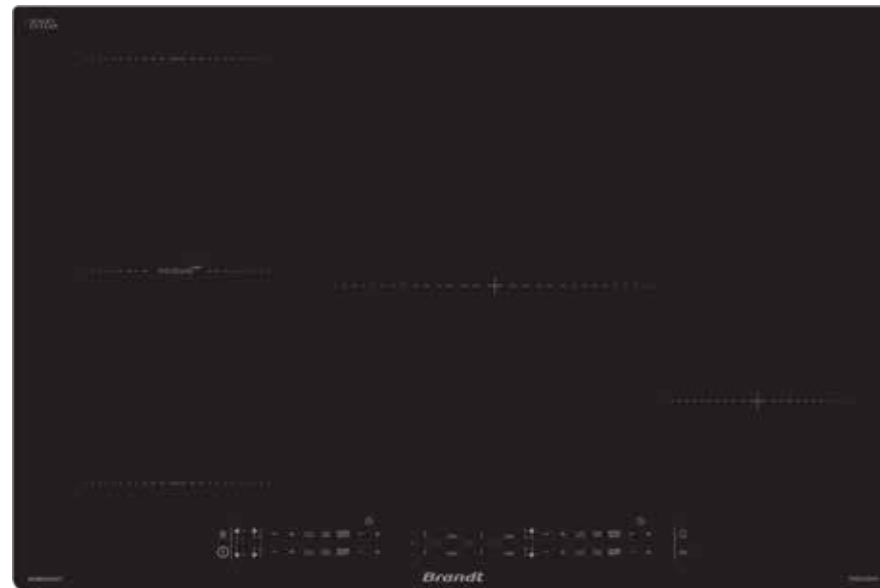

Innovative direct access functions

For faster, better-quality cooking:

- **Ultraboost:** heats up the fireplace up to 20% faster than a conventional boost function.
- **Boil:** boil up to 6 litres of water without overflowing and without worrying about time or cooking. The hob takes care of everything for you: just set the quantity of water and confirm.

Well-controlled cooking areas

- **EasyCook:** (Eco badge) identifies the ideal cooking zone according to the diameter of the pan. It helps you to reach the set temperature more quickly, thus saving energy.
- **Recall:** Stores programmed settings (power and timer) so that you can retrieve them after an unexpected power outage of the cooking zone.

- 4 timers 1 to 99 minutes
- Direct access: Ultraboost - Boil Function - Clean lock - Recall
- Pack 10 safeties: Antioverheating, Touchpad lock, Auto-stop, Anti-spill, Residual heat indicators, Cookware detection, Little utensils detection, Low voltage detection, Bad connection detection, Over voltage detection
- Built-in WxD (mm) : 750X495

BVCert-6011825

Free zone, an unlimited number of combinations

The advantage of horiZone is to allow multiple configurations to cook to suit your desires without constraints. Flexible and precise with adjustable direct access and lot of power levels, our free zone also offers a large capacity heaters with a maximum power of 4,000W for horiZone, 3,600W for duozone.

**ONLY ONE LARGE ZONE FOR:**

Several small cookware to the same power

OR

A large and unique pan

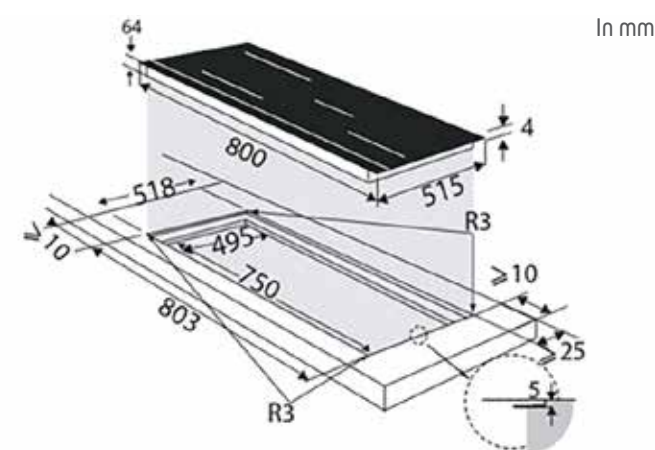

**2 INDEPENDENT COOKING ZONES:**

Baking the front, rear or on both simultaneously with different powers

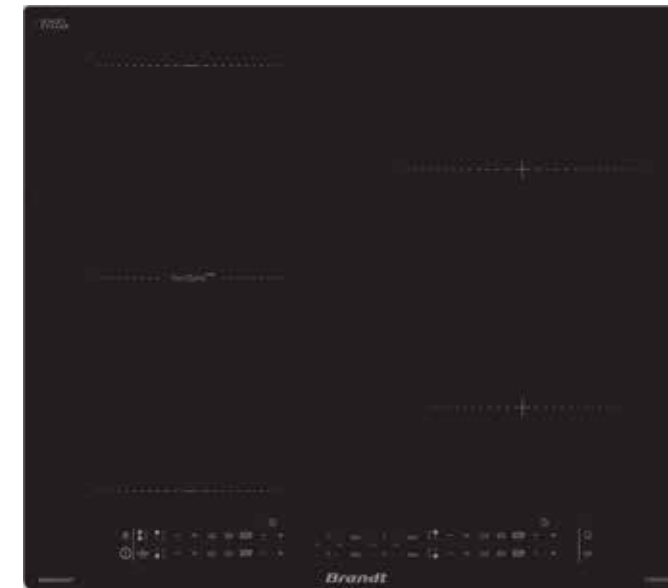

80 cm of induction space: the dimension of talent

Brandt is listening to its demanding consumers when it comes to design and functionality, and now presents its new wide induction hob, the latest addition to the Brandt collection. With its sleeker design, touch-sensitive controls dedicated to each cooking zone, and innovative direct-access functions for greater speed, precision and efficiency, this induction hob is an invitation to conviviality and has everything you need to prepare a delicious feast!

10 safety pack induction features

- **Residual heat indicator** to prevent you from touching areas that are still hot (after intensive use)
- **Small object detection** which protects from heating up a small object (spoon, ring, etc.)
- **Protection against overflows**, which automatically shuts off the hob.
- **Auto-Stop system**: if a dish is left to cook for a prolonged period of time, the hob switches off by itself.
- **Panel lock control** that can be turned on when the hob is shut off or during cooking.
- **Automatic saucepan detection**.
- **Anti-overheating cookware**: this patented, exclusive safety system limits the temperature under the cooking zone to 300°C. It regulates the heat of a piece of empty cookware so as not to damage it. For example, it prevents all risk of self-ignition of oil.
- **Low voltage, connection error and over tension detections**.

Ultraboost

Save time bringing water to the boil by concentrating the duoZone's maximum power on just one of these two burners.

For gas fans...
and induction fans

A standard 16 Ampere plug is all you need to connect in this mixed hob and benefit from the advantages of gas and the recognised qualities of induction.

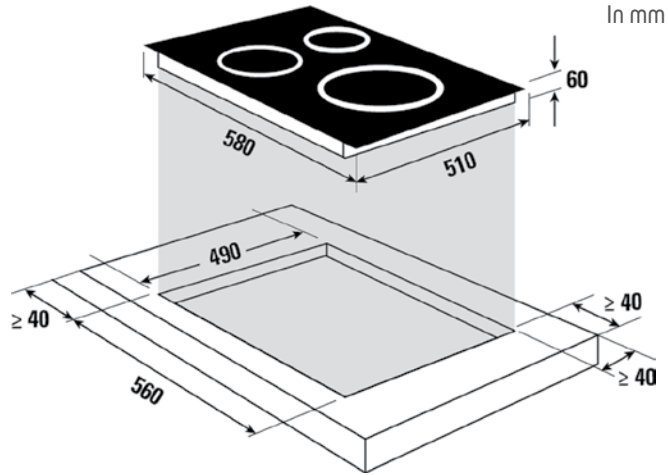

Design and performance

The refined, durable tempered glass surface features two induction zones at the front and two gas burners with single-fire cast-iron grates at the back for perfect stability!

10 pack induction safety
and gas thermocouple

Total peace of mind in the kitchen!

BPI6414BM 60cm scheme

Robustness and eco-design

In the utmost respect for the environment

Taking into account the different stages in the product life-cycle, Brandt opted upstream to produce an ecoefficient product by using natural materials with the lowest impact on the environment and those that keep the planet as clean as possible in the manufacture of its ceramic glass. Schott Ceran® glass doesn't use any toxic metals or harmful chemical products.

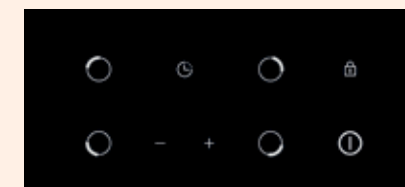

Robust vitrocereamic glass

This material has many advantages. It has high thermal resistance (up to 700°C), which allows it to bear thermal shocks. This glass is also particularly sturdy: it is not affected by chemical agents and doesn't dilate when heated, even under intense heat..

Aesthetic products

The Brandt vitrocereamic hobs have an uncluttered area with 2, 3 or 4 cooking zones and which have a dedicated sensitive keyboard or some knobs to clearly identify the control panel.

Cooking in complete safety

Equipped with a keypad lock, residual heat indicator and auto-stop, vitrocereamic hobs are safe and let you cook with complete peace of mind. Clean Lock function allows to temporarily locking appliance during cleaning. To activate Clean lock, the hob can be off or on. After a predefined time, the lock will be automatically canceled.

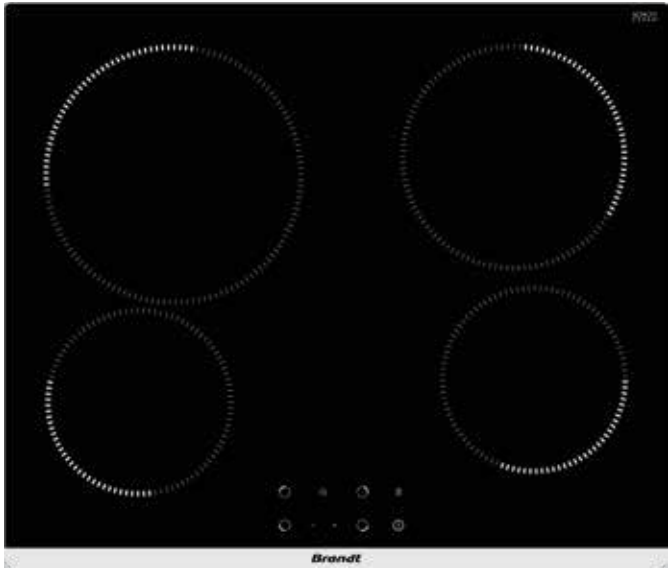

Alliance of efficiency and precision

Quicklight radiant zones: controlled quality cooking

These zones provide perfect heat distribution and are well-suited for food that needs to be simmered for a long time. These smart cooking zones have safety limit switches that self-regulate automatically: they turn on and off to maintain the selected power level. The temperature thus remains uniform and appropriate for cooking your food. The regulation frequency varies according to the selected power level.

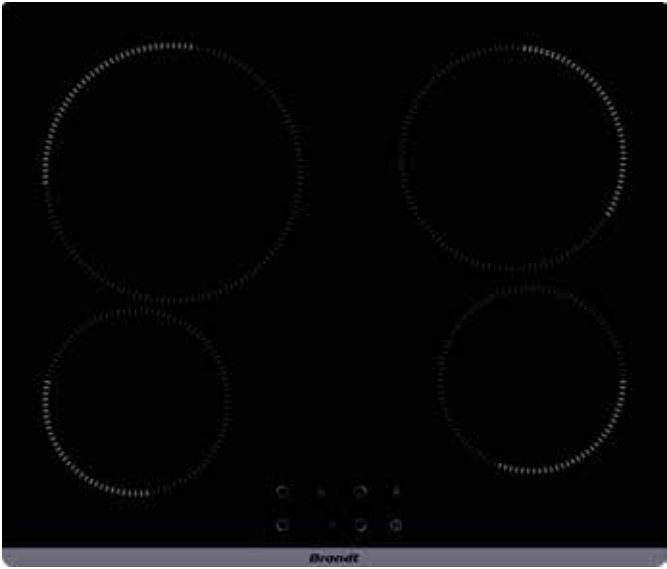

Speed and precision are required

Each heating zone is controlled either by touch-sensitive controls, or by ergonomic knobs; 9 heat settings are clearly identified on the keypad

The domino theory!

Create a harmonious ensemble by combining them as you wish with a Brandt induction or gas cooker.

Design and eco-design

A refined surface with subtle screen prints, made from ceramic glass using natural materials. It's Brandt all the way!

Brandt gas: timeless energy and design

Available in glass or stainless steel, in white or black enamel, Brandt offers a beautiful collection to give gas back its letters of nobility and match all kitchens.

The pure lines of Brandt's glass tables give the pleasure of cooking its original meaning: the elegantly shiny tempered glass withstands the most intense shocks. Their single-burner grates in cast iron, a noble material par excellence, ensure perfect stability for all your utensils, large or small.

Comfort and cooking quality

Power for every type of cooking

All the gas hobs have a different power rating for each burner size to suit your requirements, from the gentlest of mid-cooking on the 850 W auxiliary burner to the liveliest of cooking on the 3,100 W high-speed burner. The ergonomic controls are easy to grip, so you can program the intensity with precision.

Integrated electronic ignition

All it takes is one touch! Press the ignition button by turning the knob to the maximum position. Keep pressing until the burner lights up, then set the desired power.

Stamped pots burners

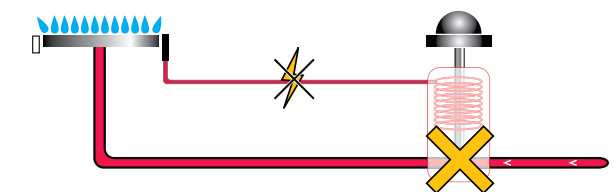

Burners can be cleaned effortlessly because they are stamped directly into the burner plates. Once the covers are removed, surface of the hob is a single piece without corners or an edge, and injectors are easily accessible.

To cook in total safety

Thermocouple: gas safe

The entire range of Brandt hobs is equipped with a thermocouple safety unit, which guarantees you maximum peace of mind.

- Burners are controlled by a tap with a security system, which, if the flame goes out accidentally, gas supply is cut off quickly and automatically to stop gas from escaping and thereby preventing any risk of leakage.
- The burner safety is a metal rod located directly to the side of the flame.
- Should the flame go out unexpectedly, the gas shuts off in less than 30 seconds.

Limiter of temperature

The electric hobs are just as safe thanks to a limiter: this safety feature indicated by a red dot on the heating zone prevents all overheating, which could cause damage to the burner.

GLASS HOB 60CM MIXED

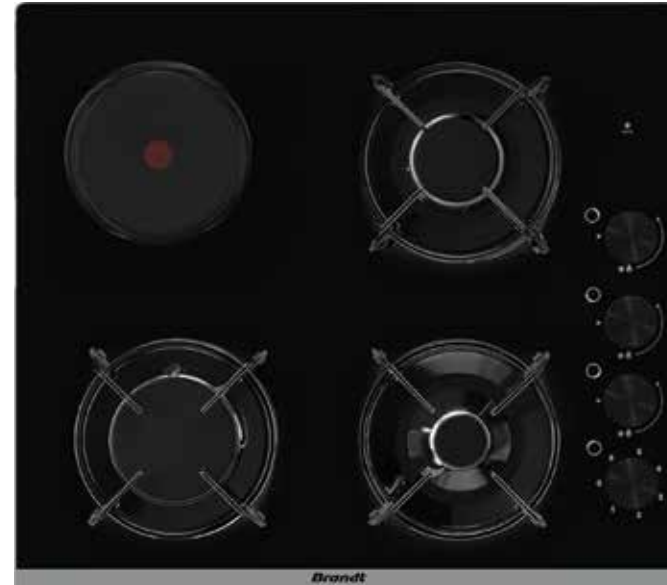

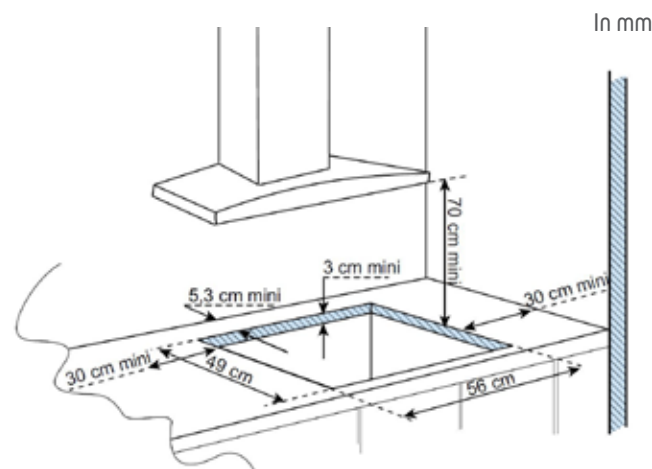

BPG6413BM BLACK

- 60cm – mixed gas and electric
- Gas
- Ignition integrated into the knobs
- 3 cooking zones:
 - Front left very-rapid – 3.1kW
 - Rear right rapid – 2.25kW
 - Front right auxiliary – 0.85kW
- Total gas power 6.2kW
- 3 grates mono-zone in enamel
- Safety device with thermocouple
- Electric
- 1 cooking zone:
 - Rear left 14.5cm – 1.5kW with limiter
- Total power 1.5kW
- Built-in WxD (mm) : 560X480

Design and functionality

The elegantly shiny glass surface is enhanced by single-fire grilles that are exceptionally stable!

Thermocouple gas safety

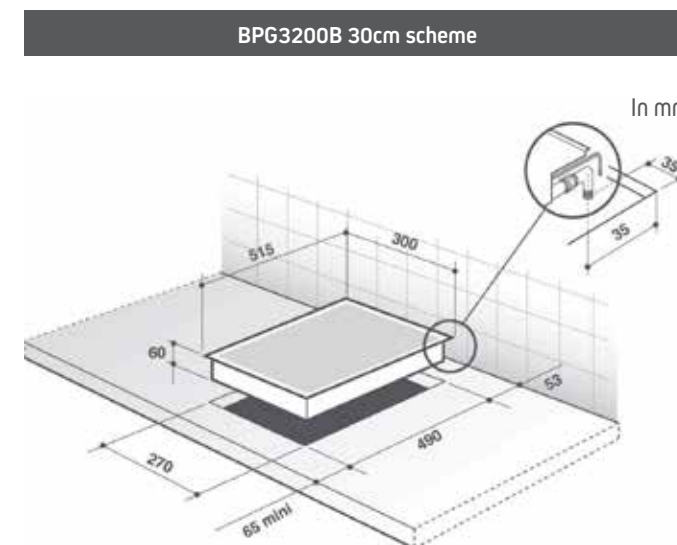

All Brandt hobs are fitted with this system to prevent gas leaks in the event of the flame being accidentally extinguished. This system, consisting of a thermal fuse, a rotating dial and a metal safety rod located near each burner, automatically cuts off the gas supply in less than 30 seconds

**BPG3200B** BLACK

- 30cm
- Ignition integrated into the Knob
- 2 gas cooking zones:
Rear right rapid – 2.8kW
Front right auxiliary – 1kW
- Total gas power 3.8kW
- 2 grates mono-zone in enamel
- Safety device with thermocouple
- Built-in WxD (mm) : 270X490

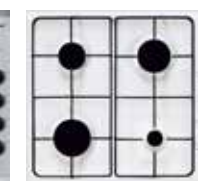

The domino theory!

Here's a good compromise for those who want to try new energies, but don't want to do without gas. Combine this gas domino with a Brandt induction domino. Their sleek black glass designs combine perfectly to create a cooking area that is as attractive as it is efficient. It offers two burners, the largest of which has a combined power of 3600 W for lively cooking and convivial dishes

**BPE6410B** BLACK

- 60cm

Limiter of temperature

The electric hobs are just as safe thanks to a limiter: this safety feature indicated by a red dot on the heating zone prevents all overheating, which could cause damage to the burner.

A collection at the cutting edge of trends

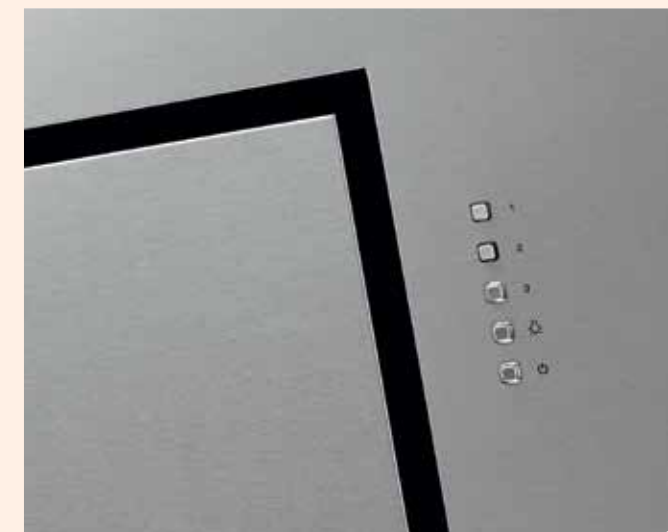

Whatever the style and configuration of your kitchen, you're sure to find the perfect hood at Brandt. Combining their sometimes-atypical aesthetics with the utmost efficiency, all have been designed to fit elegantly and functionally into the trend for contemporary kitchens.

While the island and lamp hoods sublimely the function by emphasising the singularity of their shapes, others, such as the peripheral suction models, hide their filters behind their vertical glass front or, like the filtering units, can be integrated under a wall unit. The assertive lines of the decorative wall-mounted hoods, curved or boxed in stainless steel, are adorned with glass to match Brandt cooking appliances and shine in terms of Energy Labelling.

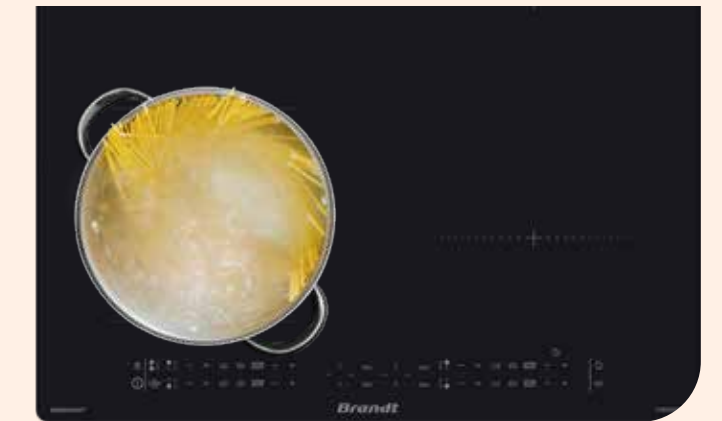

Delayed stop function

Available on models with peripheral extraction (BHV6801X and BHV1674IB), it allows you to programme the hood to switch off after a set period of time ranging from 10 to 90 minutes. Ideal for renewing the air in your room.

To effectively exhaust fumes and odours

These hoods have 3 or 4 speeds so you can change the suction power depending on the type of food you are cooking for efficient control. Equipped with extremely practical filter-cassettes and activated carbon filters, the hoods optimally filter grease and capture odours..

More comfort at the controls

To regulate light and airflow, let yourself be guided by the electronic control system with speed display, backlit buttons or touch-sensitive buttons! Comfort is guaranteed, while the purity of form is preserved.

The BHG2552B filter unit is also equipped with a remote control for lighting, start-up and suction speed adjustment.

LED lighting across the board

For greater respect for the environment and your well-being, Brandt has decided to equip all its models with LED lighting, which is more energy-efficient (using 85% less electricity) and lasts 20 times longer than incandescent bulbs.

A dimmer switch (depending on the model) allows the light to be adjusted to three levels to suit the ambience of your room

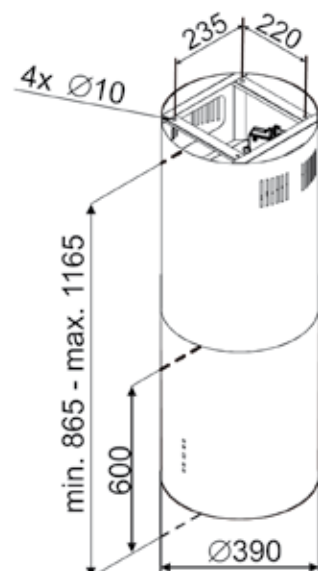

ISLAND 38CM

BHY2353B BLACK

- 38cm
- 1 motor et 1 fan
- 4 speeds

Sublimate the function!

Elegant, functional, and efficient....

- The BHY2353B** hood features the black tubular shape so popular with decorating enthusiasts and discreet soft-touch controls. Among its many benefits, it has a Timer function for programming the hood to switch off up to 90 minutes after it has been used, and to renew the air in the room.
- The BHI2353G hood's** aesthetics demonstrate its dual function: to extract air and to illuminate your kitchen space. To enhance its efficiency, its 4th Boost speed increases suction power tenfold for 5 minutes before automatically reverting to speed 3.
- As for the BHI1043X** lamp hood, it can be installed as a full-fledged island hood, but can also be wall-mounted using a sturdy stainless-steel bracket supplied with the appliance.

Energy labelling

The new energy label sticker gives more information and allows to better assess the performances about :

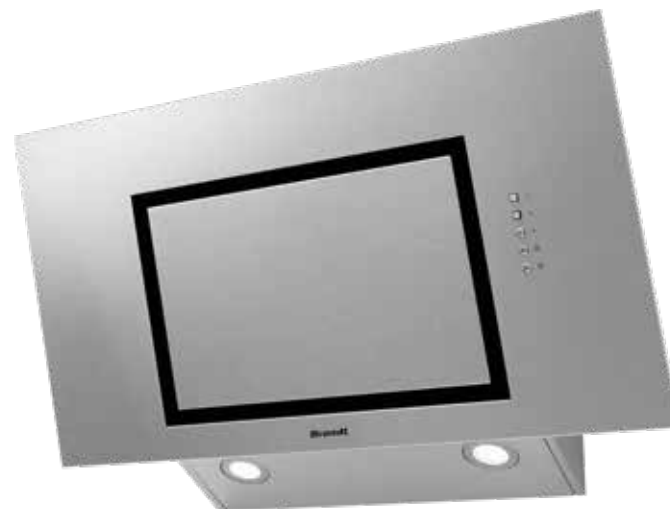

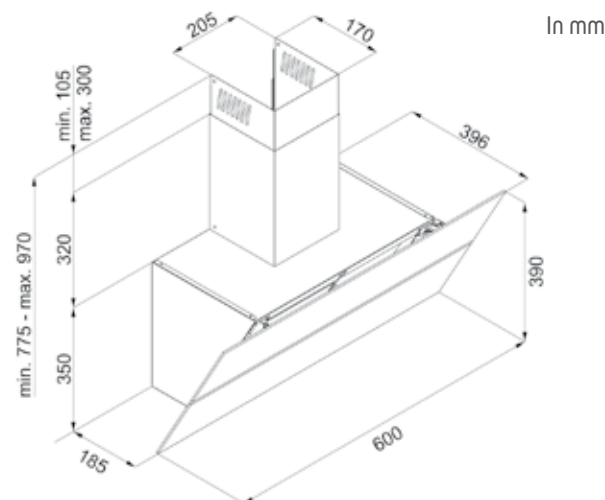

PERIPHERAL 60CM - 80CM

- Sound level in extraction:
mini 42dB(A) / maxi 57dB(A)
- Energy efficiency class: A+
- 1 aluminium grease filter
- Carbon filters supplied: FWND-185
- In option: stainless steel chimney extension ATC-252X

BHV1974IB 90cm scheme

Peripheral extraction more efficient!

This extraction system ensures an optimum balance between suction effectiveness and noise level. These original hoods concentrate their extraction area in the edges, generating a throttle in the airflow extraction without increasing the noise level, so they are innovative and efficient at the same time, giving to your kitchen a plus in design with optimal air suction results.

LED lighting: the best choice for Brandt!

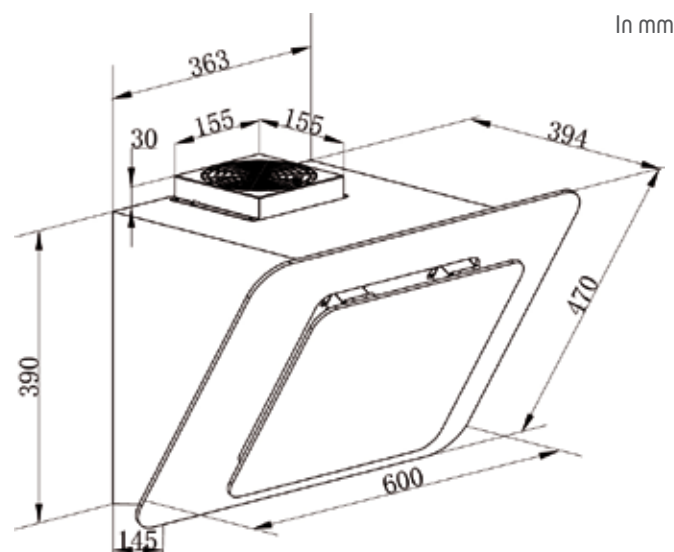

More efficient than halogen lighting and lasting up to twenty times longer than incandescent bulbs, "Light Emitting Diode" lighting saves 85% in energy costs while maintaining optimum light intensity. :

BHV1674IB BLACK

- 2 aluminium grease filters
- Carbon filters supplied: AFC-29
- Deflector and no-return valve

AD1046X 60cm scheme

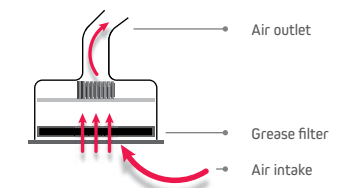

Suction

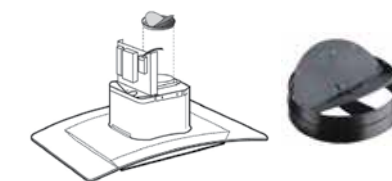

Great aspiration! brandt hoods are delivered with full equipment for perfect extraction or recycling installation.

Extraction

- Extraction installation is an ideal solution because intake air with odours, steam and smoke is pulled in and quickly dispatched towards the exterior. Connect your hood to an exterior outlet to evacuate steam that first goes through a grease filter.

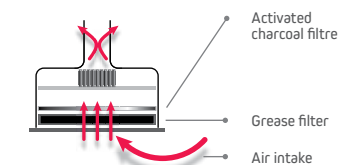

- For flawless installation, Brandt hoods are equipped with a non-return valve, which is an essential accessory so that the wind cannot push the evacuated air back into your kitchen.

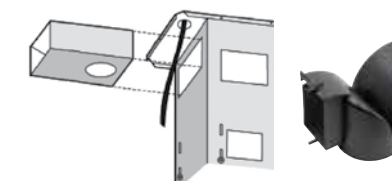

Recycling

- If you are unable to evacuate air to the outside, a recycling installation re-circulates purified air and rids it of its odours with a carbon filter..

- For optimum performance, the hoods have a deflector, an essential accessory for re-circulating air through the vents.

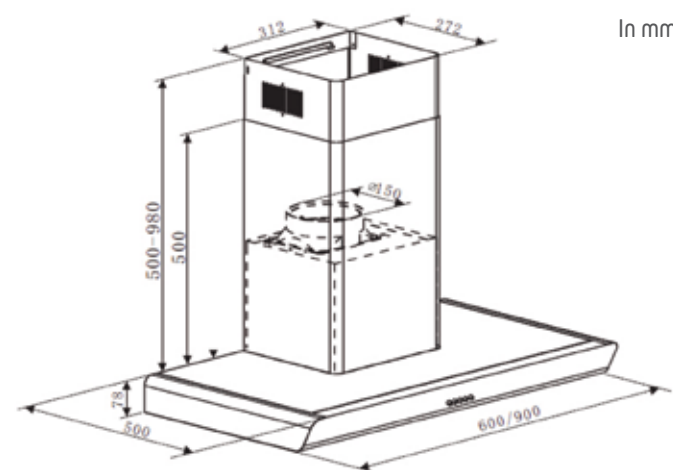

BOX 90CM-60CM PLUG AND PLAY

For efficient removal of odours and smoke

The 3 speeds allow you to modulate the suction power according to the nature of your dishes. Fitted with 2 aluminium cassette filters and activated charcoal filters for use in recycle mode, this hood ensures optimum grease filtering and odour capture. To maintain this efficiency, remember to clean the cassette filters regularly. They can be put in the dishwasher. As for the active charcoal filters, they can easily be replaced if grease becomes extremely saturated.

Perfectly discreet!

These telescopic cooker hoods, available in 90 cm or 60 cm widths, are unique in that they can be installed under a wall unit. Their controls are elegantly concealed behind a drawer panel that you simply pull towards you to switch it on.

Electronic touch-sensitive controls

With the touch of a finger, you can trigger ignition and regulate the airflow. Its self-compensating closing system ensures smooth, jolt-free operation.

For greater efficiency of the hood, the quality of its use is essential

You must follow some rules to obtain a complete satisfaction of your hood for any cooking.

- Turn on the hood before the start of cooking.
- Do not open the windows to air currents.
- Let the hood run for 5 to 10 minutes after cooking.
- Adjust the flow according to the cooking and of the presence of grill or fryer.
- Clean the grease filters.
- Change the carbon filter regularly (in the case of a recycling installation).

Brandt dishwashers The other centrepiece of your kitchen...

Brandt is sure to have the model best suited to your expectations. Available in 45 or 60 cm, with 10, 12, 13 or 14 place settings, they all come with decorative doors that match the kitchen units to create the perfect harmony.

To match efficiency and economy

Three of the programmes on offer stand out:

- **Half load option.** Don't wait until your dishwasher is completely full. Load the dishes onto one of the two baskets only and select one of the "Upper basket" or "Lower basket" buttons.
- **The Auto programme** allows the dishwasher to detect the quantity of dishes and the level of soiling, then adjust the wash settings.
- **Delayed start.** Programme a start time of 9, 12 or 24 hours later to get your dishes clean and dry when it suits you best.

More modularity and flexibility for everyday use!

The lower basket provides intuitive storage for everyday dishes, while the upper basket can be adjusted in height even when loaded. The sliding half basket offers a smart solution for more flexible storage of your small dishes.

Silence: a golden rule until the end of the cycle!

At just 44dB(A), your appliance is as discreet as can be. While some models display the remaining time on the screen, others emit a short beep at the end of the cycle. On Full built-in models, **Spotlight** lets an orange light filter through and is projected onto the floor as an information guide.

Automatic door opening for best drying

The drying by natural convection is perfected by a feature which automatically opens the door at the end of the cycle, reduce your energy consumption.

AquaSafe: greater peace of mind

Brandt has equipped all its dishwashers with anti-overflow and anti-leak safety devices for greater user safety.

vortex
WASH SYSTEM

Innovation Brandt Optimum wash quality without compromise

The performance of this new technology is unique. Combined with the Intensive, Auto or Glass programmes, it guarantees the highest washing efficiency, while reducing cycle time by a factor of four and saving 20% water and energy (compared to an Eco cycle). An additional arm releases high-pressure jets of water from the bottom of the tank. Powerful swirls of water and detergent spread into the smallest nooks and crannies to reach the dishes wherever they are and remove all traces of food residue, even the most ingrained.

This programme gives perfect washing and drying results for a daily load of dishes in only 1 hour.

Technology invented
for uncompromising results

No more handwashing! Brandt has equipped these dishwashers with an additional arm at the bottom of the tank, which distributes powerful swirls of water and detergent. This intensive wash zone makes it possible to wash the dirtiest dishes and saucepans with unequalled efficiency, while preserving fragile crockery stored in the upper basket.

Highly discreet efficiency!

These 14-cutlery models offer the very best in elegance, efficiency and functionality. Don't look for the control panel: it's hidden away on the edge of the door, out of sight. Even in operation, they have the art of being forgotten in the greatest silence, with a noise level of just 44 dB(A).

Delayed start Function

Delay the start of the cycle by 9, 12 or 24 hours (depending on the model).
Once programmed, it will start up when the time comes.
The DWJ127DS dishwasher will display on screen the time remaining until the end of the cycle. It's really useful for getting organised and setting the table!

60cm Full Built-in Dishwashers scheme

45cm Full Built-in Dishwashers scheme

45cm of pure joy to escape the chore of washing!

If you don't cook much or don't have enough space in your kitchen, this full built-in dishwasher will be your daily ally.

Half-load Function

It means you don't have to wait for the dishwasher to be completely full before starting the wash cycle. This means substantial energy savings every day.

Automatic door opening
for best drying

To maximise drying efficiency, it is essential that the hot, humid air is evacuated from the dishwasher. That's why Brandt has come up with this new function that automatically opens the door at the end of the cycle. Simple but extremely useful! The running time of your appliance is minimised, energy consumption reduced by 20% for optimum drying results!

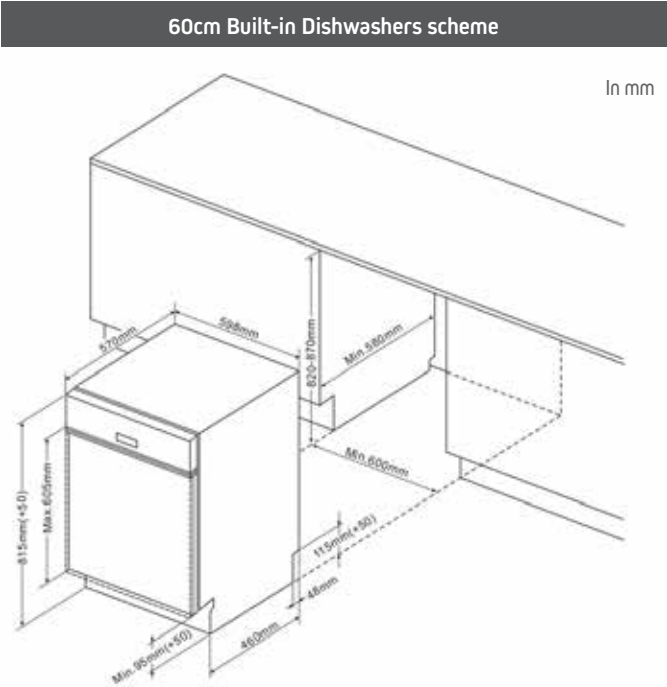

Installation at height

Built-in dishwashers generally fit under a worktop, but they can also be used as a stand-alone unit. Can also be fitted high up in a niche cabinet. Just think about it.

Half-load Function

Ideal for starting the wash cycle without waiting for the dishwasher to be completely full. You'll save a lot of energy every day.

Design and Performance

This washing machine harmoniously integrated into your kitchen, hidden behind a trim door that matches the furniture.

This washing machine seamlessly integrates into your kitchen, concealed behind a cabinet door that matches your furniture. In this way, it responds to today's trend for bathrooms and utility rooms to be designed and fitted with as much elegance and functionality as a kitchen.

With an automatic variable capacity of 9 kg, it offers a whole range of made-to-measure programmes to wash and spin all your clothes with maximum efficiency.

To take care of you and your laundry

Hygiene is a programme developed to eliminate the main viruses and up to 99% of bacteria deep down in the laundry, thanks to a 30-minute wash phase at a constant temperature (over 60°C).

Delay the start of the cycle at your convenience

Once programmed, your washing machine will start 1 to 24 hours later at a time that suits you best.

Automatic variable capacity

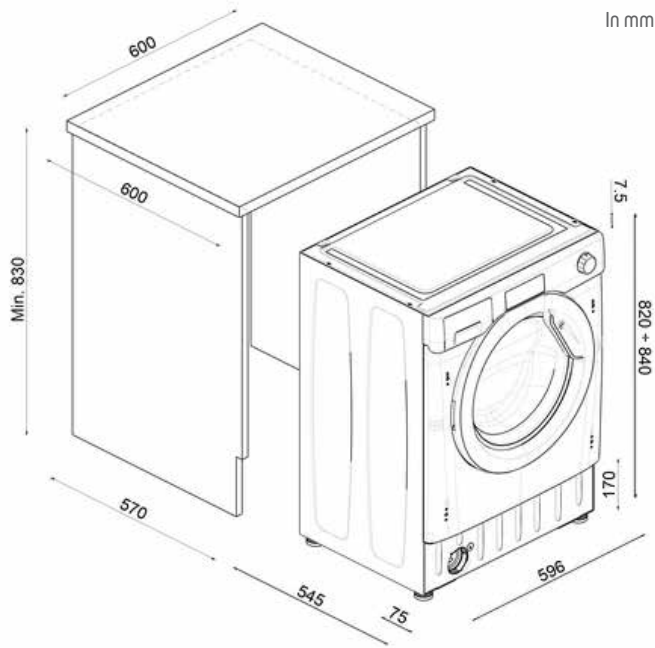

This full built-in washing machine adapts its consumption of electricity and water according to the load, so you do not need to wait to fill the washing machine up to clean your clothes efficiently.

The very best in refrigeration from Brandt!

Combined, single-door all-purpose or with 4* compartment, freezer... Brandt has selected a high-performance and functional range to meet your needs. They all fit into standard niche units and come with a decorative door that is very easy to fit thanks to their sliding system.

Electronics for perfect cooling control

Whether it's on the outside of the door or inside your fridge, the temperature setting and control screen ensures optimum preservation and freezing.

Air Circulation Cooling for Ideal Freshness

This system (combined models) allows for air circulation and even distribution throughout the refrigerator compartment, allowing it to return to the ideal temperature twice as quickly after opening the door, and preserving food for longer.

Performance and economy combined!

No more defrosting and cleaning! The No Frost system on Brandt's new appliances prevents the formation of frost inside the freezer, which wastes energy..

4* to your freezer space!

Some single-door models hide a separate compartment inside that can freeze your fresh food and store frozen food for several months in optimum conditions.

Design and functional interior layout

All have sliding Securit glass shelves for easy storage, a removable bottle rack and, depending on the model, a dedicated area for the most fragile foods, where the temperature remains below 3°C.

LED lighting, not just economical

With a lifespan 25 times longer than incandescent bulbs, LED lighting provides optimum visibility whatever the level of storage inside the fridge.

Fast Cooling: to respect the cold chain!

Especially appreciated when you're back from shopping, this function allows you to lower the freezer temperature in a very short space of time to ensure that food is frozen quickly and thoroughly.

Doors' fixation by sliding

To make optimal the assembly of decorative kitchen doors with your device, brandt provide you with adapted fixations

The refrigerator and the furniture are provided with their hinges.

The opening, the device's door is embroiled by the slides in these on the furniture's slide.

This system is simple to install or to uninstall, and offer you a perfect finish.

Performance and functionality

This freezer has everything you need to store all your food in optimum conditions:

- Electronic temperature management for better cooling control
- A bright, functional layout with 4 drawers and 4 shelves
- No frost system to prevent the formation of ice
- Automatic defrosting to put an end to the chore of cleaning

When you combine this upright freezer with the BIL1770EB all-purpose single-door freezer, you get over 500 litres of storage and freezing space!

Make way for French-style conviviality

Acquiring a wine cellar allows you to preserve your bottles under optimal conditions (stabilized temperature, absence of light, controlled humidity, etc.) and also meets the need to have your wine bottles readily available for any occasion, served at the right temperature.

Preserving and aging bottles under optimal conditions is essential for wines often purchased too young to be consumed immediately. This practice helps avoid unpleasant surprises during tasting.

Brandt presents its new wine cellars, offering you the pleasure of serving one of your finest wines at your table and sharing it with family and friends, albeit in moderation. Their small dimensions and pure, contemporary design combine with performance that's second to none to larger capacity wine cellars.

Elegant and silent, to blend discreetly and harmoniously into any living space, these wine cellars boast low F-rated energy consumption and low noise levels - only 39 dB(A) for the BIW28FB model.

To preserve each grand cru in optimum conditions

They feature a compartment fitted with wooden shelves that can store up to 36 bottles, depending on the model, and inside which the appropriate temperature is precisely managed and electronically controlled. The LED lighting makes it easy to see which bottles are being stored.

A great deal of attention has been paid to their technological design:

Control panel

concealed behind a sleek glass front, with control lock system (child safety).

Anti-UV glass holder

that filters out the ultraviolet rays that can cause irreversible oxidation of the tannins.

Anti-vibration system

The motor mounted on a Silent Bloc protects the wine from any vibrations that could alter its appearance and taste when the deposit is mixed.

Temperature alarm

When the temperature in the cellar does not match the selected temperature, or if the difference is plus or minus 5 degrees, an alarm sounds to let you know.

BIW36FB BLACK

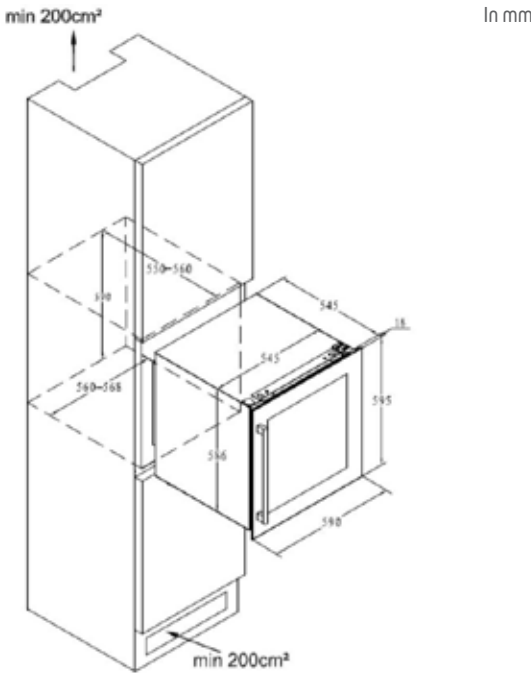

- Up to 36 bottles
- Glass door treated anti-UV
- Anti-vibration system
- Electronic temperature management

FULL BUILT-IN FRONT-LOADING WASHING MACHINE

REFERENCES	
White	WFB484QJE
GENERAL FEATURES	
Capacity (kg)	9
Drum volume (L)	59
Maximum spin speed (rpm)	1400
Energy efficiency class	A
Energy consumption (kWh/cycle)	47
Water consumption per cycle on Eco 40-60 program (L/Cycle)	48
Annual energy consumption (kWh/ 100 cycles)	/ (Old reg)
Programme duration in cotton 60°C full load	ECO 40-60: 03:38
Weighted power consumption of the off-mode and left-on mode (W)	0,5W/1,0W
Water consumption (L/year)	/ (Old reg)
Washing noise level dB(A)	47
Spin noise level dB(A)	74
Duration of program (min)	198
ADDITIONAL FEATURES	
Delayed start	23
Automatic variable capacity	Yes
Variable thermostat from 0 to 90°C	Yes
PROGRAMMES	
Washing programme number	15
Cotton	Yes
Mixed	Yes
Colours	Yes
Wool	Yes
20°C	Yes
Hand wash	Yes
Rapid 15min	Yes
Intensive	Yes
Eco 40-60°C	Yes
Hygiene	Yes
Spin speed	Yes
Rapid 60min	Yes
Jeans	Yes
Rinse	Yes
Sport	Yes
OPTIONS	
Rising +	Yes
Prewash	Yes
Steam	Yes
Anti-allergy	Yes
Quick wash	Yes
Eco Wash	Yes
USER COMFORT	
Electronic type	Digits
Remaining time	Yes
Display progress of cycle	Digits
3 product dispensers	Yes
Tub / drum material	Inox
Adjustable feet	Yes
SAFETY FEATURES	
Anti-overflow	Yes
Child safety	Yes
Anti-drumming system	Yes
Anti pertes lessivielles	Yes
INSTALLATION
