 **FABER**
FRANKFURT AIR EXPERT

70
YEARS

At Faber, we are proud of
our significant heritage.

FRANKE'S AIR EXPERT

We invented the first hood in 1955. Since 1958, we have been offering hood and air treatment solutions that meet consumer's needs and respect the environment.

Since 2005, we have been the **Air Expert of the Franke Group**, which for over 100 years stands for high quality, innovative engineering and exceptional design. Its recipe for success: building on traditions while creating new things. Together, we have grown successfully over all these years.

In 2021, Franke and Faber brands both became part of **Franke Home Solutions division**, a logical step to expand the Group's presence in the kitchen and conquer new territories together. By joining forces, we are making even better use of our know-how, experience and complementary skills.

We are now taking the opportunity to proudly announce our competence in air treatment and our expert position within the Franke Group.

It's the right moment to take this step forward, as this new endorsement, Franke's Air Expert, will enrich Faber and Franke with additional values. That's why, thanks to our leading expertise in air treatment, **we are Franke's Air Expert.**

IMPROVING AIR QUALITY SINCE 1955

AT FABER, WE ARE PROUD
OF OUR SIGNIFICANT HERITAGE.

Air is part of our origin and we have a unique expertise in our sector. Over the years we've molded air into a thousand forms, using steel, plexiglass, glass and wood. We've turned the kitchen hood into an object of design. We've given it smart functions: light fittings, air conditioner and filters. In brief, we have connected it to the future.

We understand how the world is changing and we keep innovating to make tomorrow's air even purer.

We are proud to be part of the **Franke Group** as its **Air Expert**.

This refined shade reflects our brand's iconic logo, a timeless symbol of quality, passion, and innovation. This special edition adorned with a **dedicated 70th anniversary emblem**, combines sleek design with advanced technology to honor our Faber's seven decades of excellence, reaffirming our leadership as an air expert.

THE RECIPE FOR A HEALTHIER FUTURE

We're on a mission to empower cleaner living at home through pioneering eco-friendly innovation and acting responsibly throughout our business and beyond. But we can't do it alone. By sharing the same vision and respect for the environment, we can achieve greater long-term positive impact. Here's a taste of what we have accomplished so far.

82%

of electric consumption
in 2022 was renewable
energy

92%

of waste created
in 2022 was reused

Results to date gathered by H5 Hoods division.

HOODS

Class A++ hoods are designed to reduce energy consumption by 85% compared to standard hoods thanks to their Brushless Motors, LED Light technology and other advanced technology that can benefit the entire household. As a result, Faber hoods are industry leading in terms of energy efficiency.

HOB EXTRACTORS

Durable, energy efficient solutions designed to reduce consumption by operating in sustainable and environmentally friendly ways. Faber Hob Extractors including the Galileo range are distinguished appliances with A+ up to A+++ energy efficiency ratings.

FILTERS

Designed for long lasting efficiency thanks to multilayer technology and innovative design allowing filters to be easily removed and washed in the dishwasher every 3-4 months for a maximum duration of 3 years.

OUR FIRST INSPIRATION: **PEOPLE**

At Faber, we know how to look far but also very close. We look at people because they are our inspiration. Their needs and desires are the basic principles for which we strive to supply better and better products, time after time.

We study every single action people do in a Kitchen, even the smallest one. This allows us to offer products realized in accordance with the needs of the people.

BECAUSE EVERYTHING DEPENDS
ON WELLNESS OF THE PEOPLE.

SAFETY IS IN RELIABLE HANDS

THE EU

CONDENSATION IS NO LONGER A PROBLEM

FABER ELIMINATES THE PROBLEM OF CONDENSATION

Eliminating condensation is essential to protect the wall unit where the hood is installed and to prevent drops of moisture from falling onto the hob.

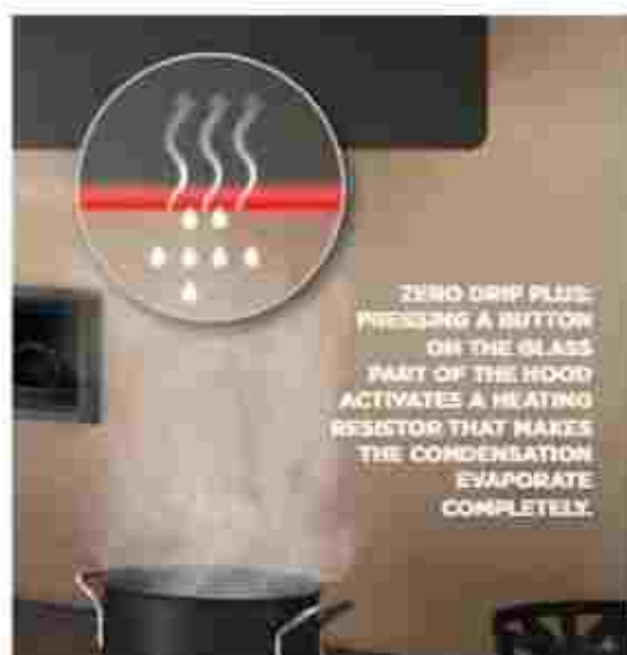

Faber has succeeded by creating special anti-condensation systems of total effectiveness.

ZERO DRIP EXTREME

The Drip-Free Extreme System features Faber's exclusive patented technology, incorporating two micro-fans and inclined filters that provide enhanced airflow and exceptional protection against humidity. This innovative system is designed to preserve and maintain the ideal environment for a dry cooking experience.

ZERO DRIP AND ZERO DRIP PLUS

The Faber Zero Drip and Zero Drip Plus systems stop condensation after it has formed. The first one collects it in a groove, preventing it from dripping onto the hob. The second makes it evaporate through contact with specially heated surfaces.

AIR TREATMENT. SMART HOODS

HOODS CONNECTED TO YOUR WORLD

All Faber hoods are fitted with an Air Quality Sensor. This innovative device monitors the air and activates suction if it detects the presence of allergens, pollutants or odours. By storing data on the Faber cloud, via an app that can be downloaded to smartphones, you can monitor the air quality at home at any time, even remotely.

K-AIR WITH INTEGRATED MONITOR

K-Air is an intelligent vertical hood with a built-in 21" monitor that can be controlled directly via the touchscreen or app. The exclusive Sensor Air Quality keeps the temperature, the percentage of humidity and the presence of volatile organic compounds (VOC and VOC), Carbon Monoxide and Nitrogen dioxide and methane under control in the domestic environment. The sensor activates the hood as soon as pollution thresholds are exceeded, primarily in the space where you cook.

AIR TREATMENT

THE IDEAL SOLUTION FOR YOUR SMART HOME

Monitors indoor air quality and restores fresh air in your kitchen

Your favourite web pages accessible anytime, connection to your internet browser (available on k-air model)

Thanks to the faber cloud, you can access it from anywhere and check your home environment

All functions can also be managed via the faber app

REMOTE MANAGEMENT TOO

The exclusive App is designed to monitor air quality in your kitchen and manage the hood remotely too, with simple and intuitive functions.

A range that is always connected.

AIR TREATMENT by Faber is a complete range comprised of vertical, ceiling, T-shape and built-in hood models. All the hoods are equipped with an Air Quality Sensor, connection to the Faber Cloud and can be controlled remotely via the App. In addition, the K-air model comes equipped with the exclusive 21.5 inch integrated monitor.

K-LINK TECHNOLOGY AND THE HOOD ADJUSTS ITSELF AUTOMATICALLY

FREE HANDS IN THE KITCHEN. THANK YOU, FABER

The beauty of cooking is also that you can express yourself freely, without distractions. If you have an induction hob and a Faber cooker hood with K-LINK connection, just start cooking and the suction power of the hood automatically adjusts to the selected cooking level.

HOB AND HOOD DIALOGUE WITH EACH OTHER

Faber has created an intelligent connection between hob and hood, through an integrated system that works with radio waves. A simple gesture is all it takes to set the hood to automatic operation. The system is always active because the radio signal is never interrupted. At the same time, the perfect operation of the hood is guaranteed avoiding the waste of energy and excessive noise that you could have set the suction at a level too high compared to the produced fumes.

The connection is always active even in the presence of dirt residues on the hob.

It can be controlled manually whenever you want.

OPTIMIZATION

QUIET IN RESPECT OF NATURE

SILENCE IS COMFORT

To make the kitchen a comfortable environment to live in, it is essential to have a hood that works making as little noise as possible, even at full power.

SOUND PRO

By reducing turbulence and swirls in the internal airflow, the new blowers technology succeeds in both limiting noise and improving the sound quality of the hood.

BRUSHLESS MOTOR

Faber is constantly looking for innovative solutions and with this motor, it guarantees the best energy efficiency on the market.

sound quality optimization

The kitchen has become a place in our homes where we share special moments with the people we love. This is why hoods must increasingly combine high performance and quiet motors. After several studies and extensive research, Faber has developed a solution: Sound PRO.

FLUID DYNAMIC OPTIMIZATION

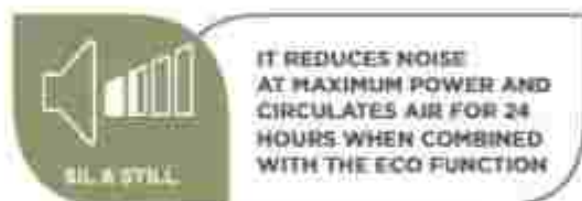

Thanks to an innovative design, the new blower significantly reduces turbulence and vortex of the internal air flow.

NOISE REDUCTION AND SOUND QUALITY OPTIMIZATION

At maximum power, the new technology limits the noise threshold of the hood up to -6db*, but it doesn't stop there. It also optimizes the sound produced, reducing the disturbance caused by high frequencies.

Available in several Faber models, check the icon on the individual product sheet.

*Data varies depending on the model in which the blower is installed.

HUSH, IT'S COOKING TIME!

SIL & STILL TECHNOLOGY

Based on the study of aerodynamic flows inside the hood and targeted sound insulation, this Faber technology reduces noise at top power to just 52 dB(A). By activating the Eco Function, it ensures continuous air exchange in the surrounding environment for 24 hours, silently and with minimum consumption below 40 dB(A) comparable to the quietness of a library.

Models with technology SIL & STILL

THE SILENT PLEASURE OF A REMOTE MOTOR

IT GUARANTEES
ENERGY SAVING AND
HIGH ASPIRATION
EFFICIENCY THANKS TO
THE QUIETEST ENGINE
ON THE MARKET

REMOTE BLOWER

The noise of the hood can be minimised by moving the motor away.

REMOTE SUCTION KIT

The remote suction kit, with the utmost simplicity, makes it possible to move the hood motor away from the cooking area.

THE SILENCE INCREASES SIX METRES AWAY

With the Remote Suction Kit, the motor can be moved to another location of the house up to six metres away from the hood. Minimal noise and maximum comfort are ensured not only in the kitchen but also in the living area.

REMOTE EXTERNAL MOTOR

The remote external motor makes it possible to install the motor entirely outside the house and eliminate noise altogether.

The model with the dedicated range of hoods is shown in the Accessories section on page. 350

SOFT LINE

REVOLUTIONISES DESIGN

Soft Line is the Faber range of hoods made with FENIX®, a high-tech material with unique characteristics. The matte, smudge-proof surface is soft to the touch and reflects very little light. It is non-porous to facilitate daily maintenance and cleaning.

FENIX® is a material with high resistance to scratches, abrasions, dry heat and acids.

Its properties make it perfect for kitchens. Another characteristic is that it can self-heal surface micro-scratches.

The Faber Soft Line consists of a suspended hood F-light (Soft Cube) and two vertical wall-mounted hoods (Soft Edge e Soft Slim).

They are all available with three FENIX® finishes: Grigio Londra, Bianco Kos, or Nero Ingo.

EXTRACTION
OF COOKING FUMES
AND STEAM

AIRLANE TECHNOLOGY

SUPERB EXTRACTION

THROUGH AN INVISIBLE DUCT

REAL POWER MAKES NO NOISE. IT KEEPS THE SECRET

AIRLANE TECHNOLOGY can be used to install more than one Faber suspended hood in suction mode without the presence of unsightly connection pipes. In this way, you can have a hood and light cluster that integrates perfectly into the décor of your kitchen.

THE POWER OF A DOUBLE SUCTION

With AIRLANE TECHNOLOGY a second motor in the false ceiling conveys fumes and cooking vapours sucked from the hood without piping.

Airlane conceals a second motor in only 30 cm of false ceiling allowing you to choose between four air outlet positions during installation.

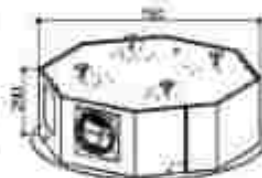

KIT AIRLANE TECHNOLOGY

AIRLANE DUCTING KIT cod. 112.0542.875

FEATURES

Finish	Ø of air outlet	Width
Stainless steel	150 mm	840 mm

THE AIRLANE KIT REPLACES THE CHIMNEY/ DUCT NEEDED FOR SUSPENDED INSTALLATION AS AN EXTRACTION HOOD.

A new plus for f-light hoods. With the following F-Light hoods, both fixed and with Up & Down movement from the ceiling, you can get rid of suction piping at last. It disappears completely thanks to AIRLANE technology, which also guarantees better air purification and Energy Class A performance.

UP&DOWN TECHNOLOGY

FREEDOM OF MOVEMENT IS IN THE AIR

In open-concept kitchen and living room combos and in those where space is restricted, there is often the need to choose a suspended hood with a design matching the interior décor. Faber solves these needs by combining the function of a hood with that of a light fitting.

THERE'S A HOOD: IT'S IN THE LIGHT FITTING

With the Up & Down technology, Faber perfectly integrates hood and light fitting, combining the needs of aspiration with those of design and lighting.

AN AMAZING SPACE-SAVING SOLUTION

These hoods are excellent space-saving solutions capable of illuminating and enhancing any type of environment, from the most linear to the most sophisticated.

UP & DOWN: NICE MOVE IN THE KITCHEN

DOWN

The hood moves down to illuminate the hob and optimise suction while cooking.

UP

The hood returns to the ceiling to form an elegant light fitting. And FABER's brand-new remote control makes movement easy.

F-LIGHT:

MOVE IN CLASS A

CARBON

THE MAXIMUM
EFFECTIVENESS
OF ACTIVATED
CARBON
FILTRATION
TO ELIMINATE 95%
OF ODOURS

HIGH FILTERING NO BAD SMELLS

ONLY FABER HOODS ELIMINATE 95% OF ODOURS

What's the most effective activated carbon filtration technology? It's called HFH, which stands for "HIGH FILTERING HOOD". And it's a FABER exclusive, of course. HFH improves hood performance by removing odours from the air almost totally.

A LARGER SURFACE AREA AND TWO LAYERS OF ULTRA-EFFICIENT FILTER MATERIAL

Faber's potent HFH technology is based on a cylindrical filter design with a far larger surface area. It's twice as effective too, because it uses two high-efficiency filtration layers with different porosities and activated carbon concentrations. That's how the filter captures both large and small particles.

FABER MAKES THINGS EASIER...QUIETLY

Unlike other activated carbon filter systems, HFH also reduces noise by around 3 dB(A). And the smart, cylindrical shape of the filter makes easy work of removing the dishwasher-compatible filter material.

The **easy-to-install** cylindrical filter has a larger area compared guaranteeing more effectiveness.

Ultra-filtering material consisting of two panels with different porosity and concentration of active carbon. The first layer captures the coarsest particles and the second smaller ones, increasing effectiveness even more.

Models with technology HFH

WATERPROOF

WATERPROOF

Any liquid spilled during cooking flows directly into a suction grid and is collected in an automatically drained tray under the hood, small enough to leave space for utensil drawer.

POWER
MANAGEMENT

POWER MANAGEMENT

Adjustable absorption setting on 4 power levels (KW)
No more blackouts at home!

REAR OUTLET

REAR OUTLET

The rear air outlet available with many FABER hoods allows fumes to be channelled to the rear instead of upwards. This eliminates the need for an upper duct, freeing up useful space above the hood.

PERIMETER
ASPIRATION

PERIMETER ASPIRATION

By drawing air through a narrowed channel, Perimeter Aspiration increases suction and reduces noise without increasing energy consumption.

FILTER ALARM

FILTER ALARM

Filter saturation alarm: warns you when it is time to clean the grease filter.

SELF - START

SELF START

A special sensor switches the hood on as soon as air temperature reaches 130°F. A smart sensor activates your hood automatically whenever needed.

AUTOMATIC
FUNCTION

AUTOMATIC FUNCTION

The hood will turn on at the most suitable speed automatically, adapting the extraction capacity to the maximum cooking level.

HOUR 24

24 HOUR

Keeping kitchens fresh and odor free around the clock, the 24 Hour feature automatically turns the hood on for 10 minutes every hour.

REMOTE
CONTROL

REMOTE CONTROL

The remote control is compatible with many Faber hoods. To adjust suction and special functions, such as the courtesy light, 24H, Up&Down and Steam Off features. Controlling your hood is easier than ever.

DELAY 30

Automatic shutdown delay: you can postpone the motor shutdown to eliminate residual odours completely.

INTENSIVE SPEED

Designed to deal with even the strongest cooking aromas, the Intensive Speed function activates maximum extraction power for 10 minutes.

BOOST

Thanks to the Double Intensive Function, Even the most persistent cooking steam and smells are eliminated in just a few minutes.

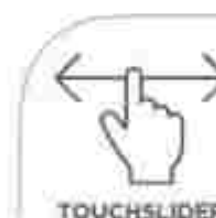

LED LIGHT DIMMER

Dimmable light: at the touch of a button the light is dimmed down and can be left on for a long time with minimal energy consumption.

TUNABLE WHITE

Choose and vary the color temperature of the light, from warmer (tending to yellow) to colder (tending to white).

TOUCH CONTROL

Extremely comfortable, user-friendly Touch Slider controls.

ACTIVATED CARBON FILTERS AS STANDARD

Essential for installation as a filtering version, these filters are made up of a combination of active carbons that work to eliminate odours and purify the air. The standard filters are already included for many hoods. They must be replaced every 2-3 months for optimal efficiency.

CERAMIC FILTER

Activated carbon ceramic filter allows to achieve high absorption efficiency. Specifically designed for selected kits suitable for Galileo extractor hob in filtering version. It is possible to regenerate the filter in the oven at 200° every 2-3 months.

- 2 x vertical flanges (rear and front) for connection to the motor
- 1 x flange with seal 220x55 mm
- 1 flat duct 220x55x500 mm
- 1 x vertical 90° bend 220x55 mm
- 1 x flat reducer 90-55 mm
- 1 x flat duct connector 220x90 mm
- 1 x flat duct 220x90x500 mm
- Recycling Kit H100

* Maximum dimensions of each kit should be adapted according to specific installation requirements, as outlined in the instruction manual available at www.faberspa.com

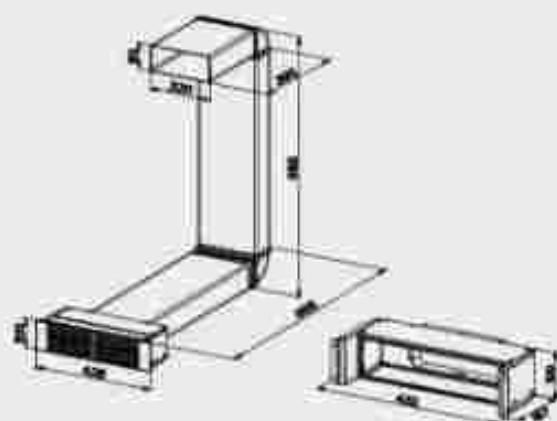

VENTING HOBS.

To install Galileo venting hobs, you will need to buy the relevant installation kit. Different kits are available, depending on your desired model and configuration, suction or filter. The details of each individual kit, with the components included in the packaging, are outlined below.

**KIT GALILEO 80°**

Recycling kit H60
cod. T12.0540.750

- 1 x flat duct 200 x 90 x 300 mm
- 2 x vertical 90° bends 220x90 mm
- 1 x flat duct 200x90x700 mm
- 1 x flat reducer 90-55 mm
- 1 flat duct 220x55x60 mm
- Recycling kit H60

**KIT GALILEO 80°**

Recycling kit H100
cod. T12.0540.761

- 1 x flat duct 200x90x300 mm
- 2 x vertical 90° bends 220x90 mm
- 2 x flat ducts 200x90x700 mm
- Recycling kit H100

**KIT GALILEO 80°**

Long lasting Recycling Kit H80
cod. T12.0605.735

- 1 x flat duct 220x90x300 mm
- 2 x vertical 90° bends 270x90 mm
- 1 x flat duct 220x90x700 mm
- 1 x flat reducer 90-55 mm
- 1 flat duct 220x55x60 mm
- L.L. H80 kit

**REAR FILTER KIT SUITABLE FOR ALL GALILEO RANGE***

Recycling Rear Filter
cod. T12.0605.046

- 1 x flat duct 220x90x300 mm
- 2 x filter support
- 1 charcoal filter H96 mm

GALILEO

INSTALLATION KITS

The following kits are compatible with models: Galileo Stripes, Galileo Bold, Galileo Linear e Galileo Slim

To install the new Galileo aspiration hobs in ducted mode, it is necessary to purchase the corresponding installation kit. For the recirculation mode, a kit with rear outlet is already supplied as standard, but it is also possible to proceed with installation with air outlet from the plinth by purchasing the corresponding installation kit.

Below are the details of each individual kit with the components supplied in the installation kits.

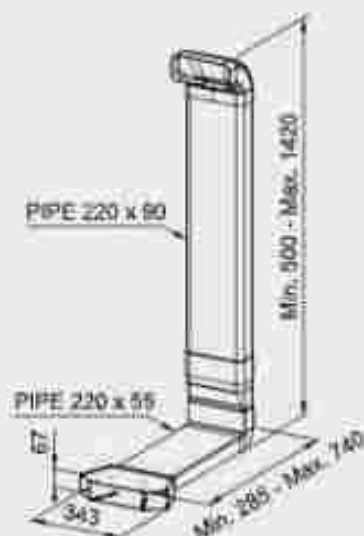

DUCTING KIT

PLINTH AIR OUTLET

cod. 112.0711.356

- 1 90° bend
- 2 90° bend
- 1 rectangular pipe 220x90x1000
- 1 horizontal 90° bend
- 1 adhesive tape

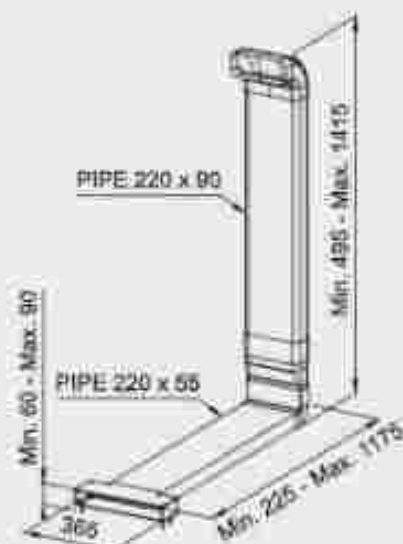

RECYCLING KIT

RECYCLING VERSION INSTALLATION / PLINTH H70

cod. 112.0711.987

- 1 90° bend 220x90
- 1 air diffuser connector 220x55
- 1 90° bend 220x90
- 1 rectangular pipe 220x90x1000
- 1 rectangular pipe connector 220x90
- 1 adhesive tape
- 1 rectangular pipe 220x55x1000
- 1 90° bend 220x55
- 1 rectangular pipes connector 220x55
- 1 rectangular pipes connector 90-55
- 1 air diffuser element

RECYCLING KIT

RECYCLING VERSION INSTALLATION / PLINTH H60

cod. 112.0711.988

MODULAR

FABER MODULAR HOOD

FLEXIBLE DESIGN FOR KITCHEN PRECISION

To perfect recipes and serve an unforgettable ambience for guests, you need kitchen appliances that go above and beyond. That's why Faber has created the Modular hood offering distinct elegance and a storage solution which can be adapted to your exact needs. A perfect addition to any industrial kitchen.

DESIGNED FOR YOU

Individual 60cm modules allow you to install the central module featuring hood, as well as your choice of additional shelving modules depending on your kitchen specification and desire.

EMBRACE SPACE

Open smoke-grey glass shelves with Matt Black frames provide a contemporary look for your kitchen and additional storage space, removing need for extra cabinets.

SWITCHED ON STYLE

Thanks to a flush LED bar complete with touch control and dimmer function, you can ensure perfect illumination of the worktop when cooking and soft light for an intimate atmosphere when entertaining guests.

POWERFUL PERFORMANCE

Faber modular delivers an exceptional 720 m³/h extraction performance in intensive mode and can be installed in extraction and recycling mode to suit your ventilation preferences and kitchen design.

TRUE DOUBLE BLACK

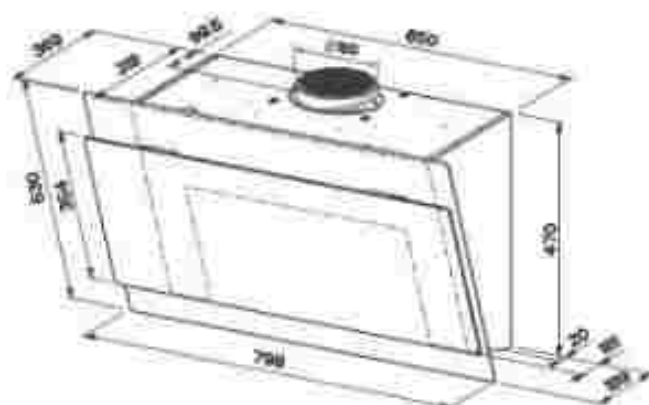

THE NEW ANGLE ON BLACK.

Enhanced cooking fume extraction, simpler cleaning and maintenance and more light in the cooking area. The new body angle lends this splendid Faber hood considerable advantages, but it's the design that will win you over. There's a strong contrast between glossy black glass rear panel and Matt black front panel, with a sophisticated and highly modern visual effect. With True Double Black, black has double the power.

To be installed at a minimum distance from the hob of 45 cm.

Sometimes it's the details that really bring out a unique personality, as with our True Black. Embellished with a Matt black element that highlights the controls in the front panel and the Fabor logo, it's a hood with standout visual appeal and functionality. The body angle lends it enhanced cooking fume extraction, simpler cleaning and maintenance and more light for the hob. The functional side of tone-on-tone.

To be installed at a minimum distance from the hob of 45 cm.

The true essence of black. Enjoy the fullness of minimalism thanks to the hidden touch controls on the glass and a glossy, extremely elegant and warming surface. But Pure Black isn't just exquisitely refined: the body angle allows enhanced cooking fume extraction, simpler cleaning and maintenance and more light. What's more, it tells you when the grease filter needs cleaning and the odour filter needs replacing through the filter maintenance light. Pure elegance.

A VERTICAL HOOD WITH THE LATEST NAUTILUS TECHNOLOGY.

Glamour by name and nature, the Glam-Fit hood is defined by a minimal, contemporary style that shows elegance in every detail.

Its clean, essential lines, complemented by a glass surface and an elegant clear surround, add refinement to any kitchen and conceal Faber's exclusive Nautilus technology.

The first ever completely flat, vertical glass hood, Glam-Fit also features an ultra-thin body of only 15 cm. Impressive performance and miserly consumption place it in energy efficiency class A. Glam-Fit comes in two finishes, black and white, both equally striking and typically Faber. Glam-Fit is also available in a "small" 55 cm version.

To be installed at a minimum distance from the hob of 50 cm.

52 DB(A) MAX CAPACITY

ECO FUNCTION:
change of air with minimum
consumption and maximum
silence.

AS SILENT AND PRECIOUS AS PURE AIR

Onyx-T is the quietest of all T-Shape hoods and guaranteed to surprise which allows an ultra silent mode. The hood's stylish design conceals FABER's exclusive SIL & STILL technology which allows functioning in ultra-silent mode at a sound level of less than 40 dB(A). Maximum comfort, minimum energy consumption and complete freedom to enjoy your home thanks to a special function that continuously exchanges air.

This Eco function switches off automatically after 24 hours. What more can we say? Faber technology leaves you speechless!

Dark grey matt / durmast wood frame

STYLE IN EVERY DETAIL, TECHNOLOGY IN EVERY BREATH.

Today, the world is one nation, the whole planet a global village. And the pleasure of country living has reached even the biggest metropolis. Today is the era of Thea. This is a hood that looks beyond the walls of your kitchen, opening up new horizons in design and redefining life in the home. But take nothing for granted! Despite its vintage soul, this hood packs the performance needed for today's industrial world.

FOOD SET

FOOD SET cod. R2-D524 R22

This professional food set boasts impressive and exclusive characteristics, including a base made from Krion, produced with the **Krion Eco-Active Solid Technology**™.

This new technology present in Krion™ Eco-Active resides in incorporating a series of activators into the product, specially developed by Krion, which when in contact with any type of light, provide Krion™ Eco-Active with the following new properties: Air purification, Anti-bacteria, Selfcleaning and Elimination of chemical products.

A large number of compounds that are dangerous to our health have been eliminated, such as pesticides present in our surroundings, and especially in the foods we consume.

The base is specially shaped to contain the set's washable food bag and solid wood cutting board. In this set, three practical accessories combine to form a unique solution.

The Thea food set is ideal for the elegant presentation of bread, charcuterie, cheese and fruit, and for use as a simple but chic platter to serve guests at important occasions with rustic aperitifs and finger foods.

FEATURES

Material: Krion base

Finish: White

Non-porous surface

Anti-bacterial properties

Made from fully recyclable, ecological material

Tough and long-lasting

Dimensions: 440x200x10 mm

MAINTENANCE

Dishwasher washable.

Self-cleaning: liquids and dirt can be cleaned from the surface of the material with greater ease, reducing the use of detergents. To remove stubborn dirt and surface scratches, clean with a dry, slightly abrasive kitchen sponge.

Material: Solid wood insert

Finish: Durmast

ORDINARY MAINTENANCE: Wipe with a damp sponge and dry with a cloth.

SPECIAL MAINTENANCE: To nourish the wood and keep the colour bright, pass a cloth dipped in a few drops of cooking oil.

KIT MENSOLA

SHELF KIT

KIT SHELF cod. 112.0527.434

This wood shelf kit is a great way to add value to your kitchen. Simple and compatible with all styles, this accessory blends great functionality and attractive design.

FEATURES

Material: Wood
Finish: Durnast
Shelf bracket: Internal
Dimensions: 600x400x30 mm

ORDINARY MAINTENANCE: For normal cleaning, simply dust the top with a soft cloth.

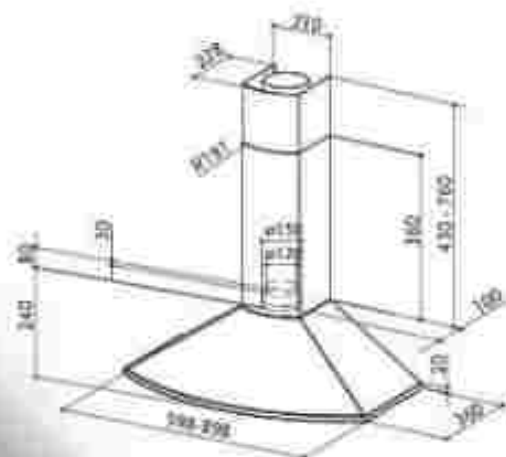

SPECIAL MAINTENANCE: Every 2 or 3 months the wooden surface must be polished using a commercially available beeswax product in a colour specific to the type of wood.

NEVER use aggressive detergents or water, as these may damage the surface varnish over time.

We recommend combining it with Thea and Thea Island hoods that have frame in the same durnast wood finish.

Perfect in their every detail, extremely powerful, ideal for all-round kitchen use. Island workstation kitchens take on a central role in the house and in daily family life: cooking instantly develops into personal flair, passion, choice, an intimate, private activity. Island decorative hoods are attractive from all viewpoints, with perfect form in all its features: there is no hidden side or corner, not seen by the naked eye. Characterised by symmetry and uniformity, illuminating the centre of our family lives.

UNIQUE PERSONALITY EXPRESSED IN PERFORMANCE.

Some ideas cast new light on everything around them: even colours, flavours and everyday gestures. In a dull, uniform world they epitomise newness, inspire beauty and establish a new sense of proportion. Chloë XL Island is one of these ideas. Designed to take style to a higher level, Chloë XL Island adds the excitement of broader horizons and new dimensions to your kitchen.

FOOD SET

FOOD SET cod. R2-0524 R22

This professional food set boasts impressive and exclusive characteristics, including a base made from Krion, produced with the **Krion Eco-Active Solid Technology™**.

This new technology present in Krion™ Eco-Active resides in incorporating a series of activators into the product, specially developed by Krion, which when in contact with any type of light, provide Krion™ Eco-Active with the following new properties: Air purification, Anti-bacteria, Selfcleaning and Elimination of chemical products.

A large number of compounds that are dangerous to our health have been eliminated, such as pesticides present in our surroundings, and especially in the foods we consume.

The base is specially shaped to contain the set's washable food bag and solid wood cutting board. In this set, three practical accessories combine to form a unique solution.

The Thea food set is ideal for the elegant presentation of bread, charcuterie, cheese and fruit, and for use as a simple but chic platter to serve guests at important occasions with rustic aperitifs and finger foods.

FEATURES

Material: Krion base
Finish: White
Non-porous surface
Anti-bacterial properties
Made from fully recyclable, ecological material
Tough and long-lasting
Dimensions: 440x200x10 mm

MAINTENANCE

Dishwasher washable.
Self-cleaning: liquids and dirt can be cleaned from the surface of the material with greater ease, reducing the use of detergents.
To remove stubborn dirt and surface scratches, clean with a dry, slightly abrasive kitchen sponge.

Material: Solid wood insert
Finish: Durmast

ORDINARY MAINTENANCE: Wipe with a damp sponge and dry with a cloth.

SPECIAL MAINTENANCE: To nourish the wood and keep the colour bright, pass a cloth dipped in a few drops of cooking oil.

KIT MENSOLA

SHELF KIT

KIT SHELF cod. 112.0527.434

This wood shelf kit is a great way to add value to your kitchen. Simple and compatible with all styles, this accessory blends great functionality and attractive design.

FEATURES

Material: Wood
Finish: Durnast
Shelf bracket: Internal
Dimensions: 600x400x30 mm

ORDINARY MAINTENANCE: For normal cleaning, simply dust the top with a soft cloth.

SPECIAL MAINTENANCE: Every 2 or 3 months the wooden surface must be polished using a commercially available beeswax product in a colour specific to the type of wood.

NEVER use aggressive detergents or water, as these may damage the surface varnish over time.

We recommend combining it with Thea and Thea Island hoods that have frame in the same durnast wood finish.

The Suspended cooker hoods were created to represent the perfect integration of design and wellbeing. The design is absolutely extraordinary and astounds the observer due to its ability to revolutionise the concept of cooker hood lighting, transforming it into a real point of light for the kitchen area. The products are technologically advanced and perfectly shaped, offering the user freedom of movement within the cooking zone. In a simple movement, elegance becomes functionality.

ADVANCED TECHNOLOGY, UNIQUE DESIGN

As beautiful as its name suggests, the Belle hood features a design that is both eye-catching and elegant. Its double panel creates an effect reminiscent of the petals of a flower. Available in two refined finishes, the original, asymmetrically shaped Belle hood is made even more desirable by Up & Down action and by the technology that has made Faber the number one name in kitchen hoods.

THE CONICAL HOOD. A MODERN CLASSIC

A thin line of stainless steel enriches the top part of this original, conical hood, which is also available with a bottom section in a different finish. The contemporary, essential design of Céline is made even more striking by Up&Down technology. The hood can be raised to the ceiling when not in use and lowered again whenever its extraordinary performance is needed. Céline comes in a choice of matt country grey and warm white.

Progress is expressed in the extremely clearcut design of a perfect hideaway structure.

The innovative, minimal look make this model hood with ceiling installation a design item that hides high performance thanks to the perimeter suction technology employed.

The perfect balance of function and form, where technology does its utmost to ensure comfort and practicality, with a discreet presence in the kitchen.

Progress is expressed in the extremely clearcut design of a perfect hideaway structure. The innovative, minimal look make this model hood with ceiling installation a design item that hides high performance thanks to the perimeter suction technology employed. The perfect balance of function and form, where technology does its utmost to ensure comfort and practicality, with a discreet presence in the kitchen.

Discreet, rational, silent.

Built-in hoods reduce the aesthetic impact of the hood in the kitchen and integrate perfectly with the cupboards.

An essential tool that's invisible to the eye.

INSTALLATION

ABC OF THE HOOD

The extraction hood expels fumes and steam out of the kitchen. It is the most effective solution.

The recycling hood filters the fumes and steam from the air and then returns it to the kitchen.

CHOOSE THE RIGHT HOOD

The necessary extraction capacity is determined by the volume of the kitchen. An effective hood changes the air of the kitchen 10 times per hour. A powerful motor is quieter and uses less energy because it is effective at low speeds.

-A hood does not create noise disturbance if its capacity is sufficient without exceeding 55 dB(A) of sound power.

-A powerful motor can be efficient even at lower, quieter speeds.

1 Fan Handbook - F. Biejer 1996

Example: A 15 m² kitchen which is 3 m tall requires a hood which aspirates at least 450 m³/h input: 15 m² x 3 m x 10 = 450 m³/h
Now consult the performance table found in the product catalogue.
The hood is efficient if an equal or higher capacity value is found in one of the speed columns.

Speed	1	2	3	4	III
Air capacity IEC point	100	205	260	315	450
Pressure	1	1	1	1	1
input	30	45	55	70	100
Noise level	48	55	58	62	68

EFFECTIVENESS = kitchen m³ × kitchen high × TO changes of air

INSTALLATION

Proper installation begins with an inspection. When choosing a hood, you should know:

Kitchen volume (which determines the necessary aspiration capacity). See section "Choosing the right hood."

Length of the cooking top (the hood is generally as long as the cooking top area).

The position and distance of the exit hole (very long and very curved right-angled tubes limit hood efficiency).

Italian D.M. 37/08 requires two aeration holes which communicate with the external wall in the presence of gas-working equipment.

1. an entrance hole for oxygenising the area, to be made in the lower part of the wall of the room which communicates externally;
2. an exit hole for fume discharge, to be made in the upper part of the wall which communicates externally (or in a chimney flue dedicated exclusively to this use).

If the hood aspirates, the exit hole can be used as a terminal conduit that carries the air outside.

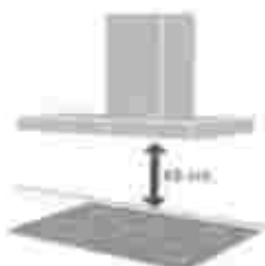

Product integrity

- Check the integrity of the hood upon opening.
- Make sure that the hood is in good conditions and has not been damaged during transport.
- The hood must arrive with its guarantee and instruction manual. Verify the receipt of any optionals (i.e. remote control).

ATTENTION: Do not install the hood if it is damaged. Have it substituted at no charge with a new one, otherwise you may be required to pay for any service assistance. Do not remove any protective films prior to installation.

Installation distance

The hood is to be installed at a minimum distance of 65 cm from the cooking top, except for particular models where is specified in the technical drawing and instructions manual.

ATTENTION: the product guarantee will not be considered valid if this distance is not respected. The hood may not reach declared performance levels if the distance from the cooking top exceeds 75 cm. Some vertical-installation models (ex. Cocktail) are to be installed lower. Check the product's technical manual.

Inspection

1 - Turn on the motor

2 - Switch on the lights

If the hood is an extraction hood, verify that it is properly connected to the exit tubing.

If the hood is a filtering hood, verify that the charcoal filters have been inserted.

First cleaning

- Remove the protective films.

- Remove impurities with a damp sponge and a small amount of neutral soap.

- Rinse with a damp cloth.

- Dry with a soft cloth. If the hood is in stainless steel, continue with a steel grade.

- You can give stainless steel hoods a protective treatment with the Faber Cils&Cils tissue.

Faber hoods are easy to install because they have EASY CUBE:

Hang the hood

Align

Connect tubing

Insert the chimney

USE AND MAINTENANCE

Switch on the hood a minute before cooking begins to create air flow that channels fumes and steam toward the aspiration surfaces.

If necessary, leave the hood switched on even after cooking is finished so that all steam and odours can be properly aspirated.

- Wash the metal anti-grease filters by hand or in the dishwasher every two months¹

- Replace synthetic anti-grease filters every two months

- Regular filter maintenance guarantees efficient hood use

ATTENTION: grease deposited on the filters is inflammable: be sure to perform regular maintenance

¹ These intervals of time refer to a regular use of the hood, approximately 3 hours per day

Hood cleaning

- Remove impurities with a damp sponge and a small amount of neutral soap²

- Rinse with a damp cloth

- Dry with a soft cloth, if the hood is in stainless steel, follow the steel brushing

- Clean the internal hood conduit once a year

² Acid-based cleaning products can damage hood surfaces

ANTI-ODOURS FILTERS

Long lasting

3
YEARS
MAX

Faber has developed a re-usable active carbon filter. Thanks to the multi-layer technology, the Long Lasting filter further increases filtration efficiency, with the double layer using an initial pre-filtration to capture the largest particles, and a second, more concentrated filtration to guarantee optimal air cleanliness.

The filter can be washed in the dishwasher every 3-4 months*, for a maximum of 3 years and dries at room temperature in a vertical position to allow the water to drain out. Alternatively, it can be placed in an oven at 50°C.

* Normal use cooker hood, by around 3 hours per day

High performance

6
MONTHS
MAX

High-efficiency filter with a highly-concentrated carbon micro-granular structure that can guarantee more than 80% filtration capacity of intake fumes and a duration of up to 6 months, double that of a normal charcoal filter, making for economic savings of more than 20%.

CERAMIC FILTER

Charcoal filter that can be regenerated in the oven at 200° every 2-3 months and allows to reach high absorption efficiency

CLIN & CLIN CLEANING LINE

Clin&Clin revitalising paste

Removes marks, spots and small rust stains caused by daily use, restoring a natural shine to steel surfaces.

Clin&Clin protective tissues

Protect and maintain the beauty of steel surfaces over time. Practical and disposable. To be applied on clean, dry surfaces.

QUALITY AND SAFETY

Faber hoods benefit from 60 years of competence in the treatment of kitchen air

- We were the first in the kitchen hood sector to obtain an ISO 9001 company quality system certificate.
- System integrated with Quality, Safety and Environment certified by SGS respecting the ISO 9001:2000, OHSAS 18001 and ISO 14001 norms.
- We have received the SGS Excellence Certificate, the absolute first in the world, number 001.
- All Faber hoods conform to European safety standards (EC mark of conformity), and have also been certified by the IMQ, a reliable, independent organisation further guaranteeing clients on quality (IMQ mark of security).

FABER HOODS ARE DESIGNED FOR SAFETY

Hammered internal edges and tempered glass to avoid risks of cutting.

Thermo-protected motors and self-extinguishing plastics help avoid any risk of fire.
Electronics are solid state, cables and connections are all placed correctly to avoid electric shock or dangerous sparks.

All Faber hoods have undergone safety and performance tests.

Aspiration and noise capacity have been measured according to standard norms:

- EN 61591
- EN 60704-3

unique specifications for surveying kitchen hood performance.

ATTENTION: Comparisons between different brand hoods should be carried out on complete data obtained according to these standards.

The Faber laboratory is NEMKO and IMQ certified.

ASSISTANCE

Faber Technical Assistance is also active in Europe

Check the website www.faberspa.com for phone numbers

- Information about products
- Information about shop branches
- Information about where to purchase spare parts and accessories
- Activation of technical assistance request
- Product or service complaints

The cost of the call may vary depending on the operator used.
Please consult the rates of your operator.

All Faber products are covered with a 2-year "Full guarantee".

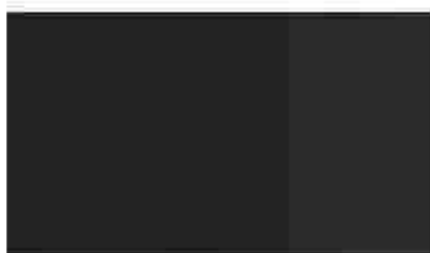

"Full guarantee" that covers any compliant defects which might be revealed on the hood over this period.

This guarantee does not cover defects not attributable to Faber such as those caused by erred installation, by any use not compliant with the instructions detailed in the instruction manual or by damage caused during transport.

The performance shown in this catalogue is declared in accordance with the new Code of Conduct signed by the most qualified European manufacturers members of CECED (European Committee of Domestic Equipment Manufacturers), a strict code for transparency which establishes clear rules to measure air flow and noise level for hoods, common to all cooker hoods manufacturers:

- air capacity according to IEC/EN 61591 method (with the hood fitted using a ducting pipe)
- noise level according to IEC/EN 60704-3 method (sound power)
