FABER

FRANKE’S AIR EXPERT

FABER

At Faber,
we are proud
of our significant
heritage.

FRANKE'S AIR EXPERT

We invented the first hood in 1955. Since 1958, we have been offering hood and air treatment solutions that meet consumer's needs and respect the environment.

Since 2005, we have been the **Air Expert of the Franke Group**, which for over 100 years stands for high quality, innovative engineering and exceptional design. Its recipe for success: building on traditions while creating new things. Together, we have grown successfully over all these years.

In 2021, Franke and Faber brands both became part of **Franke Home Solutions division**, a logical step to expand the Group's presence in the kitchen and conquer new territories together. By joining forces, we are making even better use of our know-how, experience and complementary skills.

We are now taking the opportunity to proudly announce our competence in air treatment and our expert position within the Franke Group.

It's the right moment to take this step forward, as this new endorsement, Franke's Air Expert, will enrich Faber and Franke with additional values. That's why, thanks to our leading expertise in air treatment, **we are Franke's Air Expert**.

IMPROVING AIR QUALITY SINCE 1955

AT FABER, WE ARE PROUD OF OUR SIGNIFICANT HERITAGE

Air is part of our origin and we have a unique expertise in our sector. Over the years we've molded air into a thousand forms, using steel, plexiglass, glass and wood.
We've turned the kitchen hood into an object of design.
We've given it smart functions: light fittings, air conditioner and filters. In brief, we have connected it to the future.

We understand how the world is changing and we keep innovating to make tomorrow's air even purer.

We are proud to be part of the **Franke Group as its Air Expert.**

THE RECIPE FOR A HEALTHIER FUTURE

We're on a mission to empower cleaner living at home through pioneering eco-friendly innovation and acting responsibly throughout our business and beyond. But we can't do it alone. By sharing the same vision and respect for the environment, we can achieve greater long-term positive impact.
Here's a taste of what we have accomplished so far.

76%

of electric consumption in 2022 was renewable energy.

87%

of waste created in 2022 was reused or recycled.

78%

of Franke packaging is made from renewable materials.

Results to date gathered by HS Hoods division.

HOODS

Class A++ hoods are designed to reduce energy consumption by 85% compared to standard hoods thanks to their Brushless Motors, LED Light technology and other advanced technology that can benefit the entire household. As a result, Faber hoods are industry leading in terms of energy efficiency.

HOB EXTRACTORS

Durable, energy efficient solutions designed to reduce consumption by operating in sustainable and environmentally friendly ways. Faber Hob Extractors including the Galileo range are distinguished appliances with A+ up to A+++ energy efficiency ratings.

FILTERS

Designed for long lasting efficiency thanks to multilayer technology and innovative design allowing filters to be easily removed and washed in the dishwasher every 3-4 months for a maximum duration of 3 years.

OUR FIRST INSPIRATION: PEOPLE

At Faber, we know how to look far but also very close. We look at people because they are our inspiration. Their needs and desires are the basic principles for which we strive to supply better and better products, time after time.

We study every single action people do in a Kitchen, even the smallest one. This allows us to offer products realized in accordance with the needs of the people.

BECAUSE EVERYTHING DEPENDS ON WELLNESS OF THE PEOPLE.

SAFETY IS IN RELIABLE HANDS

THE EU SAFETY MARK

THE ITALIAN QUALITY MARK

INTERNATIONAL SAFETY CERTIFICATION BY INTERTEK ETL

THE QUALITY MARK FOR THE USA AND CANADA

THE CHINESE QUALITY MARK

When everything is working as it should, home is a more useful place. And when the air is pure and clean, home becomes a place of true functionality.
That's what reliability means to us: making life better for years to come.

RECORDS IN EXCELLENCE

- The first **ISO 9001** Quality Certification in the field of kitchen hoods.
- **SGS Certificate of Excellence n°001:** a worldwide first.
- Integrated Management System for Quality (**ISO 9001:2015**), Occupational Health and Safety (**OHSAS 18001**) and the Environment (**ISO 14001**) certified by SGS.
- Products conforming to the strictest safety requirements and to standards **EN 61591** and **EN 60704-3**, tested in an authorized in-house laboratory, certified and guaranteed by leading international bodies.

Reliability
is a constant characteristic
of all Faber products.

AIR HUB. A BREATH OF FRESH AIR

EMBRACE PURITY AT HOME.
That's why Faber is investing all its air expertise to create solutions that inspire well-being with ecological systems that can eliminate up to 99.9% of viruses and bacteria.

AIR HUB: TWO PRODUCTS IN ONE FOR PURE WELL-BEING
A system to disinfect the air and a T-shaped hood - this is the dual nature of the Air Hub, a unique, dual-function product in a simple, elegant design, perfect for any style of interior.

1

AIR DISINFECTION FOR THE HOME AND ELIMINATION OF UP TO 99.99%* OF VIRUSES AND BACTERIA

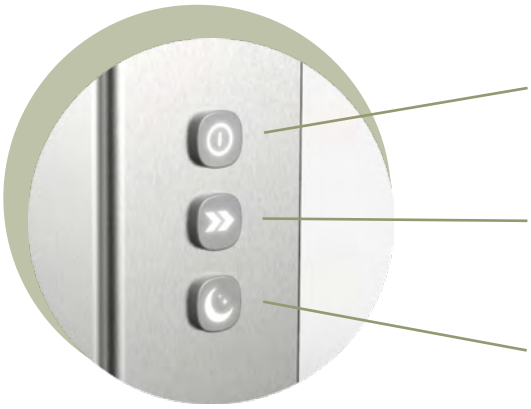
2 **REMOVES COOKING VAPOURS AND ODOURS**

AIR HUB
THE PUREST AIR EXPERIENCE

Air Hub guarantees clean, safe air for your kitchen and living environments. In fact, thanks to its UV-C technology, **it eliminates up to 99.99% of viruses and bacteria***, all without using chemicals.

*Laboratory tests carried out on E.coli and Staphylococcus aureus by the University of Siena.

UV-C LAMP TECHNOLOGY KILLS VIRUSES AND BACTERIA WITH ABSOLUTE SAFETY AND NO OZONE PRODUCTION



MANUAL Start the disinfection of the air. You can switch off manually, or it will automatically switch off after 24 hours.

INTENSIVE Maximum speed of disinfection in the shortest possible time. Switches off automatically.

NIGHT Long cycle for complete disinfection with the minimum level of noise. Automatically switches on each night.

FABER CLOUD

IT MONITORS AIR QUALITY IN THE KITCHEN AT ANY MOMENT, EVEN FROM YOUR SMARTPHONE

AIR QUALITY SENSOR

IT AUTOMATICALLY ADJUSTS SUCTION POWER TO RESTORE PERFECT AIR QUALITY

AIR TREATMENT. SMART HOODS

HOODS CONNECTED TO YOUR WORLD
All Faber hoods are fitted with an Air Quality Sensor. This innovative device monitors the air and activates suction if it detects the presence of allergens, pollutants or odours. By storing data on the Faber cloud, via an app that can be downloaded to smartphones, you can monitor the air quality at home at any time, even remotely.

K-AIR WITH INTEGRATED MONITOR
K-Air is an intelligent vertical hood with a built-in 21" monitor that can be controlled directly via the touchscreen or app. The exclusive Sensor Air Quality keeps the temperature, the percentage of humidity and the presence of volatile organic compounds (VOC and VOC), Carbon Monoxide and Nitrogen dioxide and methane under control in the domestic environment.
The sensor activates the hood as soon as pollution thresholds are exceeded, primarily in the space where you cook.

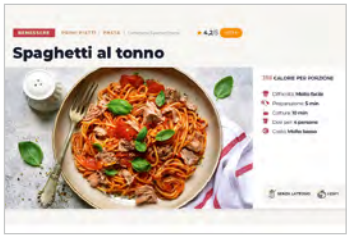
FABER

AIR TREATMENT
THE IDEAL SOLUTION FOR YOUR SMART HOME

Monitors indoor air quality and restores fresh air in your kitchen



Your favourite web pages accessible anytime, connection to your internet browser (available on k-air model)

Thanks to the faber cloud, you can access it from anywhere and check your home environment

All functions can also be managed via the faber app

REMOTE MANAGEMENT TOO

The exclusive App is designed to monitor air quality in your kitchen and manage the hood remotely too, with simple and intuitive functions.

A range that is always connected.
AIR TREATMENT by Faber is a complete range comprised of vertical, ceiling, T-shape and built-in hood models. All the hoods are equipped with an Air Quality Sensor, connection to the Faber Cloud and can be controlled remotely via the App. In addition, the K-air model comes equipped with the exclusive 21.5 inch integrated monitor.

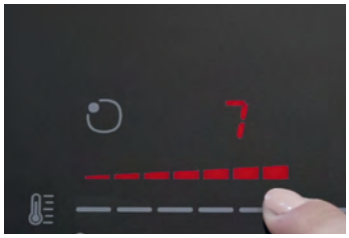
K-LINK
IT AUTOMATICALLY MANAGES SUCTION POWER WITH RADIO CONNECTION BETWEEN HOOD AND INDUCTION HOB
FABER
AUTOMATIC ADJUSTMENT OF THE HOOD POWER TO EXTRACT VAPOURS AND ODOURS.

K-LINK TECHNOLOGY
AND THE HOOD ADJUSTS ITSELF AUTOMATICALLY

FREE HANDS IN THE KITCHEN. THANK YOU, FABER
The beauty of cooking is also that you can express yourself freely, without distractions. If you have an induction hob and a Faber cooker hood with K-LINK connection, just start cooking and the suction power of the hood automatically adjusts to the selected cooking level..

HOB AND HOOD DIALOGUE WITH EACH OTHER
Faber has created an intelligent connection between hob and hood, through an integrated system that works with radio waves. A simple gesture is all it takes to set the hood to automatic operation. The system is always active because the radio signal is never interrupted. At the same time, the perfect operation of the hood is guaranteed avoiding the waste of energy and excessive noise that you could have set the suction at a level too high compared to the produced fumes.

The connection is always active even in the presence of dirt residues on the hob.



It can be controlled manually whenever you want.

Hood Models compatible with Faber Induction Hobs.

STEAM OFF SYSTEM

IT TOTALLY ELIMINATES THE CONDENSATION EFFECT THANKS TO THE DUAL ACTION OF AIR

ZERO DRIP PLUS

IT EVAPORATES CONDENSATION THROUGH CONTACT WITH SPECIALLY HEATED SURFACES

ZERO DRIP

IT COLLECTS CONDENSATION IN A GROOVE, PREVENTING IT FROM FALLING BACK ONTO THE HOB

SUCTION PAIRED WITH HELICAL AIR JETS AND VARIABLE GEOMETRY ELIMINATES THE CONDENSATION EFFECT

CONDENSATION
IS NO LONGER A PROBLEM

FABER ELIMINATES THE PROBLEM OF CONDENSATION
Eliminating condensation is essential to protect the wall unit where the hood is installed and to prevent drops of moisture from falling onto the hob. Faber has succeeded by creating special anticondensation systems of total effectiveness.

STEAM OFF SYSTEM
The Steam Off System implementing Faber exclusive technology eliminates the problem from the beginning, avoiding the formation of condensation. While sucking in, the hood emits controlled jets of air that by whirling and accelerating, promoting the upward movement and convey the vapours to capture them all.

ZERO DRIP
The Faber Zero Drip and Zero Drip Plus systems stop condensation after it has formed. The first one collects it in a groove preventing it from dripping onto the hob. The second makes it evaporate through contact with specially heated surfaces.

SOUND PRO

IT REDUCES TURBULENCE AND SWIRLS IN THE INDOOR AIRFLOW THANKS TO NOISE-LIMITING DIFFUSER TECHNOLOGY

BRUSHLESS

IT GUARANTEES ENERGY SAVING AND HIGH ASPIRATION EFFICIENCY THANKS TO THE QUIETEST ENGINE ON THE MARKET

SOUND PRO:

- FLUID DYNAMIC OPTIMIZATION
- NOISE REDUCTION
- SOUND QUALITY OPTIMISATION

QUIET
IN RESPECT OF NATURE

SILENCE IS COMFORT
To make the kitchen a comfortable environment to live in, it is essential to have a hood that works making as little noise as possible, even at full power.

SOUND PRO
By reducing turbulence and swirls in the internal airflow, the new blowers technology succeeds in both limiting noise and improving the sound quality of the hood.

BRUSHLESS MOTOR
Faber is constantly looking for innovative solutions and with this motor, it guarantees the best energy efficiency on the market.

sound quality optimization

The kitchen has become a place in our homes where we share special moments with the people we love. This is why hoods must increasingly combine high performance and quiet motors. After several studies and extensive research, Faber has developed a solution: Sound PRO.

FLUID DYNAMIC OPTIMIZATION
Thanks to an innovative design, the new blower significantly reduces turbulence and vortex of the internal air flow.

NOISE REDUCTION AND SOUND QUALITY OPTIMIZATION
At maximum power, the new technology limits the noise threshold of the hood up to -6db*, but it doesn't stop there. It also optimizes the sound produced, reducing the disturbance caused by high frequencies.

Available in several Faber models, check the icon on the individual product sheet.

*Data varies depending on the model in which the blower is installed.

SIL & STILL

IT REDUCES NOISE AT MAXIMUM POWER AND CIRCULATES AIR FOR 24 HOURS WHEN COMBINED WITH THE ECO FUNCTION

HUSH, IT'S COOKING TIME!

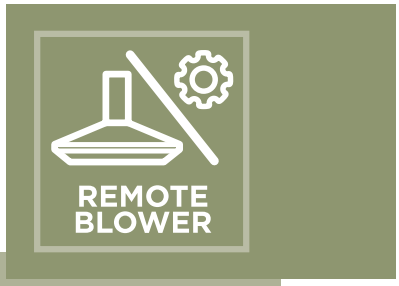
SIL & STILL TECHNOLOGY

Based on the study of aerodynamic flows inside the hood and targeted sound insulation, this Faber technology reduces noise at top power to just 52 dB(A). By activating the Eco Function, it ensures continuous air exchange in the surrounding environment for 24 hours, silently and with minimum consumption below 40 dB(A) comparable to the quietness of a library.

Models with technology SIL & STILL

ONYX-T

THE SILENT PLEASURE OF A REMOTE MOTOR

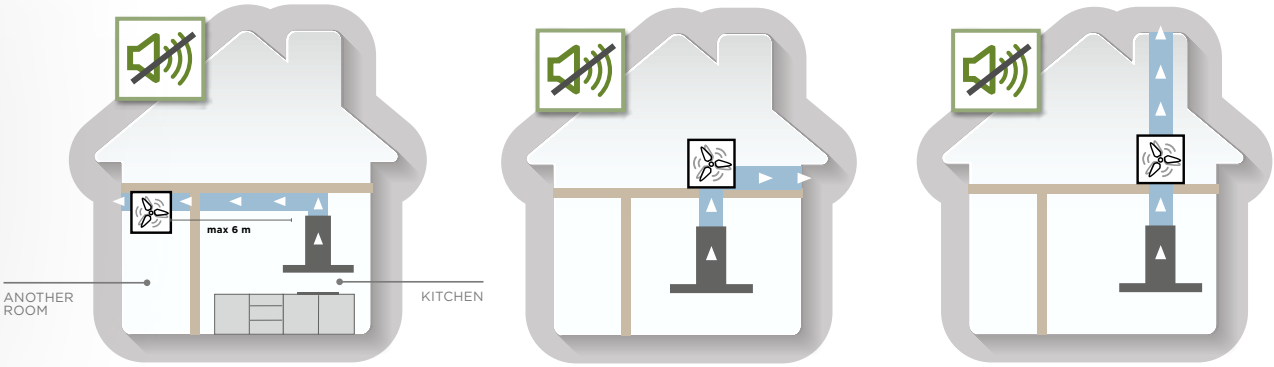


IT ALLOWS THE MOTOR TO BE INSTALLED AWAY FROM THE HOOD, ENSURING MAXIMUM ACOUSTIC COMFORT

REMOTE BLOWER
The noise of the hood can be minimised by moving the motor away.

REMOTE SUCTION KIT
The remote suction kit, with the utmost simplicity, makes it possible to move the hood motor away from the cooking area.

THE SILENCE INCREASES SIX METRES AWAY
With the Remote Suction Kit, the motor can be moved to another location of the house up to six metres away from the hood. Minimal noise and maximum comfort are ensured not only in the kitchen but also in the living area.



REMOTE EXTERNAL MOTOR

The remote external motor makes it possible to install the motor entirely outside the house and eliminate noise altogether.

The model with the dedicated range of hoods is shown in the Accessories section on page. 358

SOFT TOUCH

IT PROVIDES A SURFACE THAT IS SOFT AND SMOOTH TO THE TOUCH THANKS TO FENIX™ TECHNOLOGY, A MATERIAL WITH UNIQUE CHARACTERISTICS

OPAQUE

IT REFLECTS LIGHT DIFFUSELY ON A SURFACE THAT IS SOFT TO THE TOUCH AND STAIN RESISTANT

ANTITOUCH

IT ENSURES A PERFECTLY CLEAN HOOD AND A SMUDGE-FREE SURFACE THANKS TO THE SPECIAL ANTI-STAIN MATERIAL

FENIX®

USED AS A KITCHEN TOP IT IS A PERFECT MATCH FOR THE HOOD.

SOFT LINE
REVOLUTIONISES DESIGN

Soft Line is the Faber range of hoods made with FENIX®, a high-tech material with unique characteristics. The matte, smudge-proof surface is soft to the touch and reflects very little light. It is non-porous to facilitate daily maintenance and cleaning.

FENIX® is a material with high resistance to scratches, abrasions, dry heat and acids.
Its properties make it perfect for kitchens. Another characteristic is that it can self-heal surface micro-scratches.

The Faber Soft Line consists of a suspended hood F-light (Soft Cube) and two vertical wall-mounted hoods (Soft Edge e Soft Slim).
They are all available with three FENIX® finishes: Grigio Londra, Bianco Kos or Nero Ingo.

Available:

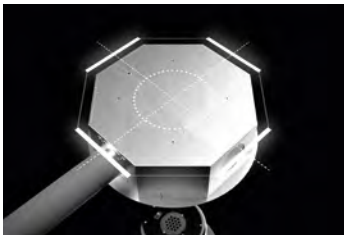
Soft Edge

AIRLANE
IT GUARANTEES MAXIMUM SUCTION THANKS TO A SECOND MOTOR IN THE CEILING, THROUGH AN INVISIBLE PASSAGE WITHOUT PIPING
4
EXPULSION FROM THE HOME ENVIRONMENT
3
SUPERIOR PURIFICATION THANKS TO THE OVERHEAD MOTOR
2
CREATION OF AN ASCENDING AIR VORTEX
1
EXTRACTION OF COOKING FUMES AND STEAM
FABER

AIRLANE TECHNOLOGY
SUPERB EXTRACTION THROUGH AN INVISIBLE DUCT

REAL POWER MAKES NO NOISE. IT KEEPS THE SECRET.
AIRLANE TECHNOLOGY can be used to install more than one Faber suspended hood in suction mode without the presence of unsightly connection pipes. In this way, you can have a hood and light cluster that integrates perfectly into the décor of your kitchen.

THE POWER OF A DOUBLE SUCTION.
With AIRLANE TECHNOLOGY a second motor in the false ceiling conveys fumes and cooking vapours sucked from the hood without piping.



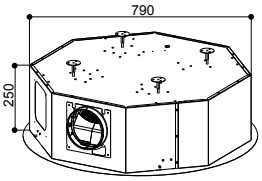
Airlane conceals a second motor in only 30 cm of false ceiling allowing you to choose between four air outlet positions during installation.

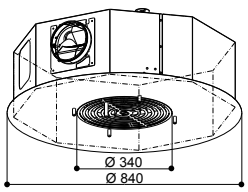
KIT AIRLANE TECHNOLOGY

AIRLANE DUCTING KIT cod. 112.0542.875

FEATURES		
Finish	**Ø of air outlet**	**Width**
Stainless steel	150 mm	840 mm

THE AIRLANE KIT REPLACES THE CHIMNEY/ DUCT NEEDED FOR SUSPENDED INSTALLATION AS AN EXTRACTION HOOD.





A new plus for f-light hoods. With the following F-Light hoods, both fixed and with Up & Down movement from the ceiling, you can get rid of suction piping at last. It disappears completely thanks to AIRLANE technology, which also guarantees better air purification and Energy Class A performance.

IT OPTIMISES SUCTION THANKS TO THE HOOD THAT DESCENDS ON THE HOB AND RETRACTS INTO THE CEILING WHEN NOT NEEDED

UP

A DESIGNER LIGHT FITTING THAT FURNISHES THE SPACE AT ANY TIME OF THE DAY

DOWN

A HOOD THAT MOVES DOWN FOR MAXIMUM SUCTION EFFICIENCY WHILE COOKING

UP&DOWN TECNOLOGY
FREEDOM OF MOVEMENT IS IN THE AIR

In open-concept kitchen and living room combos and in those where space is restricted, there is often the need to choose a suspended hood with a design matching the interior décor. Faber solves these needs by combining the function of a hood with that of a light fitting.

THERE'S A HOOD: IT'S IN THE LIGHT FITTING.
With the Up & Down technology, Faber perfectly integrates hood and light fitting, combining the needs of aspiration with those of design and lighting.

AN AMAZING SPACE-SAVING SOLUTION.
These hoods are excellent space-saving solutions capable of illuminating and enhancing any type of environment, from the most linear to the most sophisticated.

UP & DOWN: NICE MOVE IN THE KITCHEN

DOWN
The hood moves down to illuminate the hob and optimise suction while cooking.

UP
The hood returns to the ceiling to form an elegant light fitting. And FABER's brand-new remote control makes movement easy.

F-LIGHT: MOVE IN CLASS A
All F-Light models with their energy efficiency go far while bringing comfort closer.

HIGH FILTERING

IT ELIMINATES 95% OF ODOURS, GUARANTEEING MAXIMUM EFFECTIVENESS IN FILTERING ACTIVATED CARBON

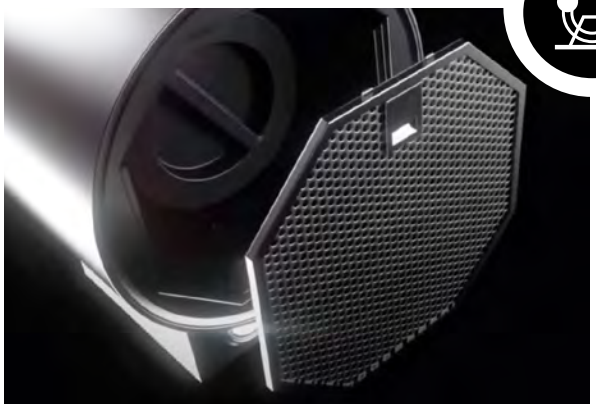
THE MAXIMUM EFFECTIVENESS OF ACTIVATED CARBON FILTRATION TO ELIMINATE 95% OF ODOURS

HIGH FILTERING
NO BAD SMELLS

ONLY FABER HOODS ELIMINATE 95% OF ODOURS
What's the most effective activated carbon filtration technology? It's called HFH, which stands for "HIGH FILTERING HOOD". And it's a FABER exclusive, of course. HFH improves hood performance by removing odours from the air almost totally.

A LARGER SURFACE AREA AND TWO LAYERS OF ULTRA-EFFICIENT FILTER MATERIAL
Faber's potent HFH technology is based on a cylindrical filter design with a far larger surface area. It's twice as effective too, because it uses two high-effciency filtration layers with different porosities and activated carbon concentrations. That's how the filter captures both large and small particles.

FABER MAKES THINGS EASIER...QUIETLY
Unlike other activated carbon filter systems, HFH also reduces noise by around 3 dB(A). And the smart, cylindrical shape of the filter makes easy work of removing the dishwashercompatible filter material.



The **easy-to-install** cylindrical filter has a larger area compared guaranteeing more effectiveness.

Ultra-filtering material consisting of two panels with different porosity and concentration of active carbon. The first layer captures the coarsest particles and the second smaller ones, increasing effectiveness even more.

Models with technology HFH

Stilo Comfort

Stilo Glass Smart

Stilo Smart

Nice

Ray

WATERPROOF

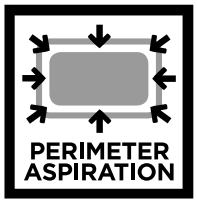
Any liquid spilled during cooking flows directly into a suction grille and is collected in an automatically drained tray under the hood, small enough to leave space for a utensil drawer.

POWER MANAGEMENT

Adjustable absorption setting on 4 power levels (KW). No more blackouts at home!

REAR OUTLET

The rear air outlet available with many FABER hoods allows fumes to be channelled to the rear instead of upwards. This eliminates the need for an upper duct, freeing up useful space above the hood.



PERIMETER ASPIRATION

25% less* perceived noise. Perimeter suction exploits the Venturi effect to accelerate the air flow through a narrow gap. The air slows down again once inside the hood for more efficient extraction.

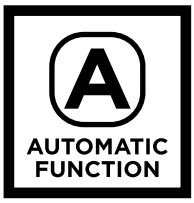
*Equivalent to a reduction of 3 dB(A) according to EN 60704-3.

FILTER ALARM

Filter saturation alarm: warns you when it is time to clean the anti-grease filter or substitute the anti-odour filter.

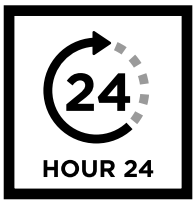
SELF-START

A special sensor switches the hood on as soon as air temperature reaches 35°C. A smart sensor activates your hood automatically whenever needed. Faber loves to make cooking easier and more enjoyable!



AUTOMATIC FUNCTION

The hood will turn on at the most suitable speed automatically, adapting the extraction capacity to the maximum cooking level.



HOUR 24

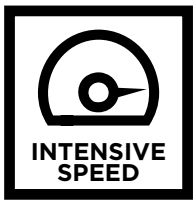
Key 24: function which allows the hood to be switched on for 24 hours a day for air renewal with a level of noise that is imperceptible.

REMOTE CONTROL

The remote control is compatible with many Faber hoods. To adjust suction and special functions, such as the courtesy light, 24H, Up&Down and Steam Off features. Controlling your hood is easier than ever.

DELAY 30

Automatic shutdown delay: you can postpone the motor shutdown to eliminate residual odours completely.

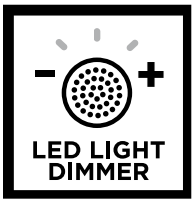


SPEED I

Intensive speed: function which activates maximum aspiration for 6 minutes to meet special cooking needs.

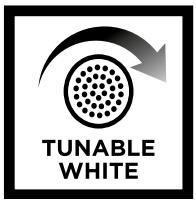
BOOST

Thanks to the Double Intensive Function. Even the most persistent cooking steam and smells are eliminated in just a few minutes.



LED LIGHT DIMMER

Dimmable light: at the touch of a button the light is dimmed down and can be left on for a long time with minimal energy consumption.



TUNABLE WHITE

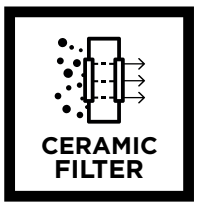
On some models, you can choose and vary the colour temperature of the light, from warmer (tending to yellow) to colder (tending to white).

TOUCH CONTROL

Extremely comfortable, user-friendly Touch Slider controls.

ACTIVATED CARBON FILTERS AS STANDARD

Essential for installation as a filtering version, these filters are made up of a combination of active carbons that work to eliminate odours and purify the air. The standard filters are already included for many hoods. They must be replaced every 2–3 months for optimal efficiency.



CERAMIC FILTER

Activated carbon ceramic filter allows to achieve high absorption efficiency. Specifically designed for selected kits suitable for Galileo extractor hob in filtering version. It is possibile to regenerate the filter in the oven at 200° every 2-3 months.

NEW

GALILEO LINEAR

With a timelessly elegant vertical stainless steel grid and energy efficiency class A+ with 600 m^3/h at boost speed, this model is a harmonious blend of sophistication and performance. Redefine your cooking space with enduring style.

GALILEO SMART

(Class A++) extractor hob. Cast-iron grille featuring iconic Faber design. The mid-range option.

NEW

GALILEO SLIM

Sleek and powerful with a compact design, a potent 630 m^3/h extractor and energy efficiency class A+, this model sets a new standard for enduring performance.

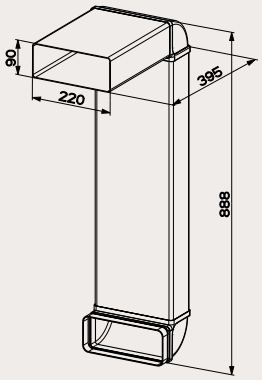
CHOOSE THE BEST ONE FOR YOUR NEEDS

GALILEO 60

Its versatile and adapts to kitchens of limited dimensions while maintaining high quality and performance.

GALILEO
INSTALLATION KITS

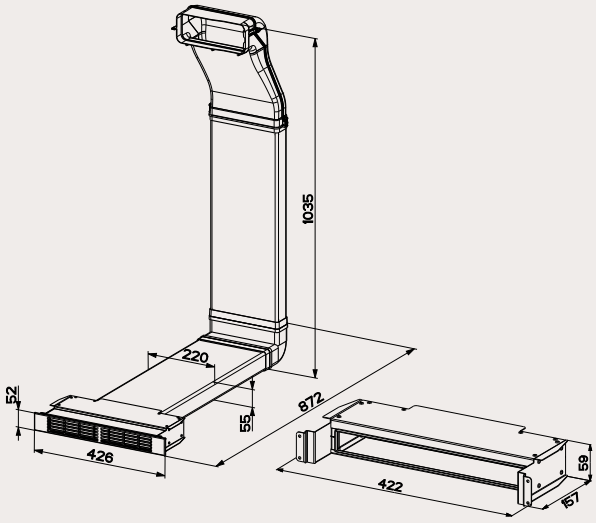
The following kits are compatible with models:
Galileo Glass, Galileo NG, Galileo Smart e Galileo 60



DUCTING KIT SUITABLE FOR ALL GALILEO RANGE*

Ducting kit
cod. 112.0540.782

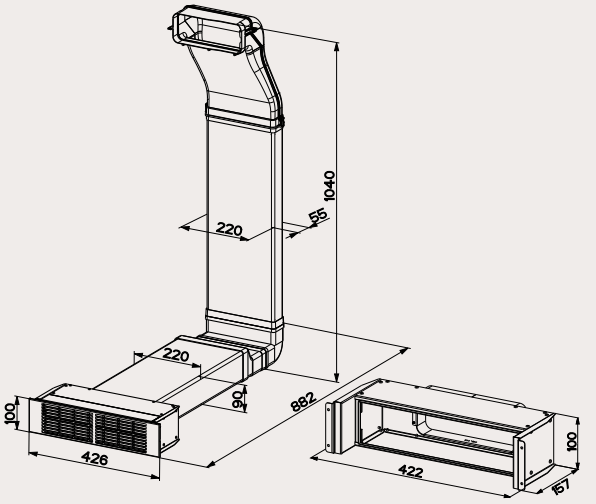
- 1 x flat duct, 200 x 90 x 300 mm
- 2 x vertical 90° bends, 220 x 90 mm
- 1 x flat duct, 200 x 90 x 700 mm
- 1 x duct adapter



KIT GALILEO 60*

Recycling kit H60
cod. 112.0626.656

- 2 x vertical flanges (rear and front) for connection to the motor
- 1 x flange with seal, 220 x 55 mm
- 2 x flat ducts, 220 x 55 x 60 mm
- 1 x vertical 90° bend, 220 x 55 mm
- Recycling kit H60



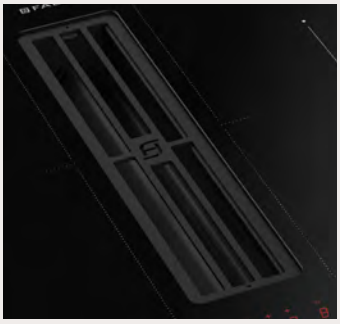
KIT GALILEO 60*

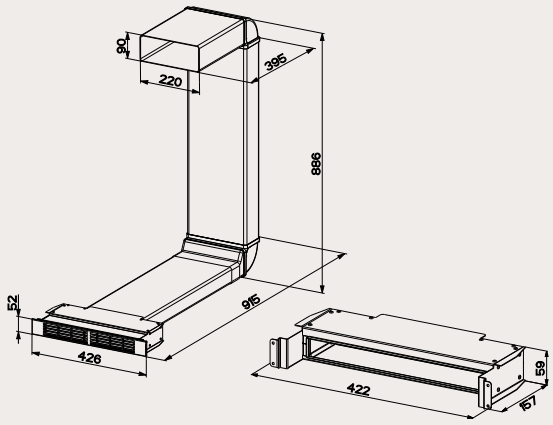
Recycling Kit H100
cod. 112.0626.657

- 2 x vertical flanges (rear and front) for connection to the motor
- 1 x flange with seal, 220 x 55 mm
- 1 flat duct, 220 x 55 x 60 mm
- 1 x vertical 90° bend, 220 x 55 mm
- 1 x flat reducer, 90-55 mm
- 1 x flat duct connector, 200 x 90 mm
- 1 x flat duct, 220 x 90 x 500 mm
- Recycling Kit H100

* Maximum dimensions of each kit should be adapted according to specific installation requirements, as outlined in the instruction manual available at www.faberspa.com

VENTING HOBS.
To install Galileo venting hobs, you will need to buy the relevant installation kit. Different kits are available, depending on your desired model and configuration, suction or filter. The details of each individual kit, with the components included in the packaging, are outlined below.

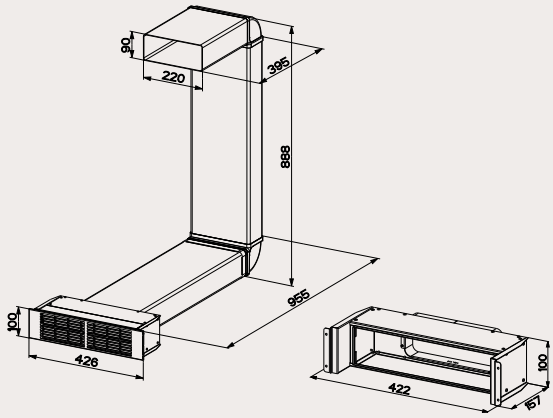




KIT GALILEO 80*

Recycling kit H60
cod. 112.0540.730

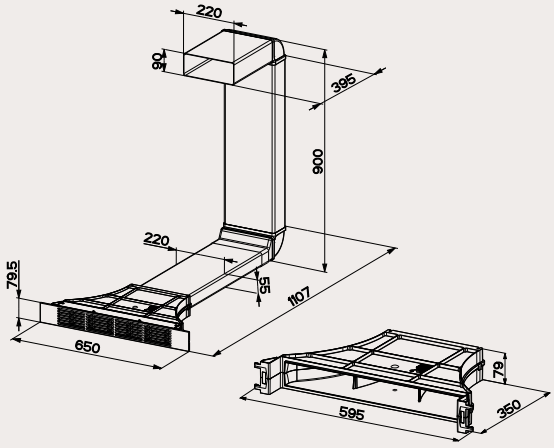
- 1 x flat duct, 200 x 90 x 300 mm
- 2 x vertical 90° bends, 220 x 90 mm
- 1 x flat duct, 200 x 90 x 700 mm
- 1 x flat reducer, 90-55 mm
- 1 flat duct, 220 x 55 x 60 mm
- Recycling kit H60



KIT GALILEO 80*

Recycling kit H100
cod. 112.0540.781

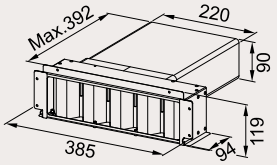
- 1 x flat duct, 200 x 90 x 300 mm
- 2 x vertical 90° bends, 220 x 90 mm
- 2 x flat ducts, 200 x 90 x 700 mm
- Recycling kit H100



KIT GALILEO 80*

Long lasting Recycling Kit H80
cod. 112.0605.735

- 1 x flat duct, 200 x 90 x 300 mm
- 2 x vertical 90° bends, 220 x 90 mm
- 1 x flat duct, 200 x 90 x 700 mm
- 1 x flat reducer, 90-55 mm
- 1 flat duct, 220 x 55 x 60 mm
- LL H80 kit



REAR FILTER KIT SUITABLE FOR ALL GALILEO RANGE*

Recycling Rear Filter
cod. 112.0685.046

- 1 x flat duct, 200 x 90 x 300 mm
- 2 x filter support
- 1 charchoal filter H96 mm

GALILEO
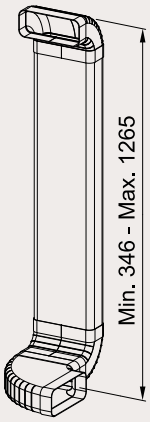
INSTALLATION KITS

The following kits are compatible with models: Galileo Glass, Galileo NG, Galileo Smart e Galileo 60

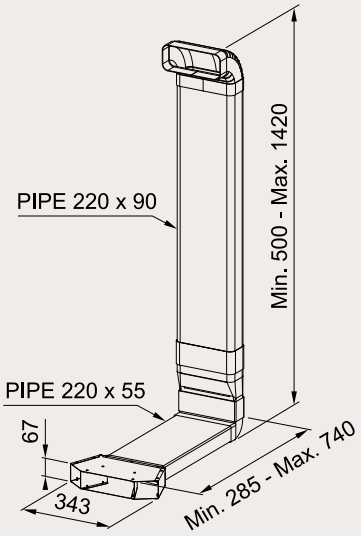
To install the new Galileo aspiration hobs in ducted mode, it is necessary to purchase the corresponding installation kit. For the recyrculation mode, a kit with rear outlet is already supplied as standard, but it is also possible to proceed with installation with air outlet from the plinth by purchasing the corresponding installation kit.
Below are the details of each individual kit with the components supplied in the installation kits.



DUCTING KIT

PLINTH AIR OUTLET
cod. 112.0711.356

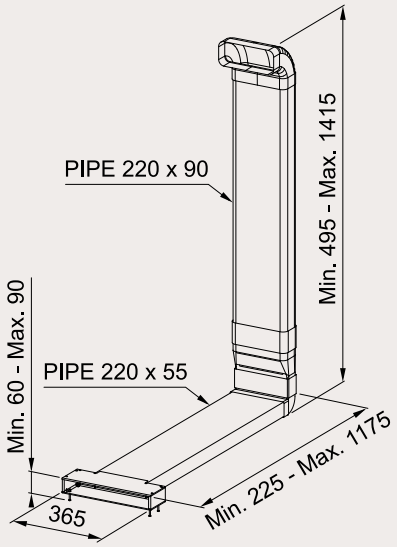
- 1 90° bend
- 2 90° bend
- 1 rectangular pipe 220x90x1000
- 1 horizontal 90° bend
- 1 adhesive tape



RECYCLING KIT

RECYCLING VERSION INSTALLATION / PLINTH H70
cod. 112.0711.987

- 1 90° bend 220x90
- 1 air diffuser connector 220x55
- 1 90° bend 220x90
- 1 rectangular pipe 220x90x1000
- 1 rectangular pipe connector 220x90
- 1 adhesive tape
- 1 rectangular pipe 220x55x1000
- 1 90° bend 220x55
- 1 rectangular pipes connector 220x55
- 1 rectangular pipes connector 90-55
- 1 air diffuser element



RECYCLING KIT

RECYCLING VERSION INSTALLATION / PLINTH H60
cod. 112.0711.988

TECHNOLOGICAL PLUS

MOBILE APP VIA FABER CLOUD
Mobile APP via Faber Cloud keeps you informed through the dedicated app when it reaches unsafe conditions, allowing remote control too.

AIR QUALITY INDICATOR
constantly monitors Indoor Air Quality in your kitchen.

AUTO FUNCTION
it automatically sets and controls the aspiration phase to remove pollution and restore fresh air in your kitchen.

RECIPIES PLAY VIDEO
Full web browser and audio di users. Hear your favourite music or cooking assistant THROUGH (non true!) video recipes.

FULLY INTEGRATED WHIT AMAZON ALEXA
Use voice control to switch on/off the hood, set aspiration level and control the lights.

CONNECTED TO YOUR HOME ADDITIONAL DEVICE
Connect your wi-fi / IP remote cameras. Always visible directly into your hood monitor.

MULTIPLE TIMER
Multiple Timer management.

SHOW YOUR FAVORITE
Your favourite picture slideshow in the Kitchen.

TOUCH MONITOR 21.5
21.5 inches touch display.

TUNABLE WHITE
Set dimmerable white LED intensity.

FABER

FABER MODULAR HOOD

FLEXIBLE DESIGN FOR KITCHEN PRECISION

To perfect recipes and serve an unforgettable ambience for guests, you need kitchen appliances that go above and beyond. That's why Faber has created the Modular hood offering distinct elegance and a storage solution which can be adapted to your exact needs. A perfect addition to any industrial kitchen.

DESIGNED FOR YOU

Individual 60cm modules allow you to install the central module featuring hood, as well as your choice of additional shelving modules depending on your kitchen specification and desire.

EMBRACE SPACE

Open smoke-grey glass shelves with Matt Black frames provide a contemporary look for your kitchen and additional storage space, removing need for extra cabinets.

SWITCHED ON STYLE

Thanks to a flush LED bar complete with touch control and dimmer function, you can ensure perfect illumination of the worktop when cooking and soft light for an intimate atmosphere when entertaining guests.

POWERFUL PERFORMANCE

Faber modular delivers an exceptional 720 m3/h extraction performance in intensive mode and can be installed in extraction and recycling mode to suit your ventilation preferences and kitchen design.

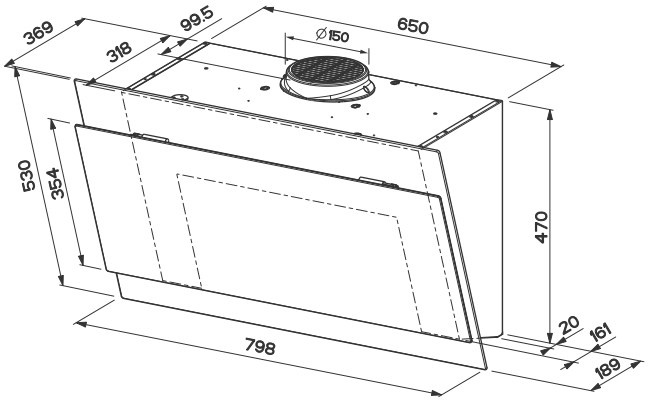
TRUE DOUBLE BLACK

FABER

FABER

THE NEW ANGLE ON BLACK.
Enhanced cooking fume extraction, simpler cleaning and maintenance and more light in the cooking area. The new body angle lends this splendid Faber hood considerable advantages, but it's the design that will win you over. There's a strong contrast between glossy black glass rear panel and Matt black front panel, with a sophisticated and highly modern visual effect. With True Double Black, black has double the power.



To be installed at a minimum distance from the hob of 45 cm.

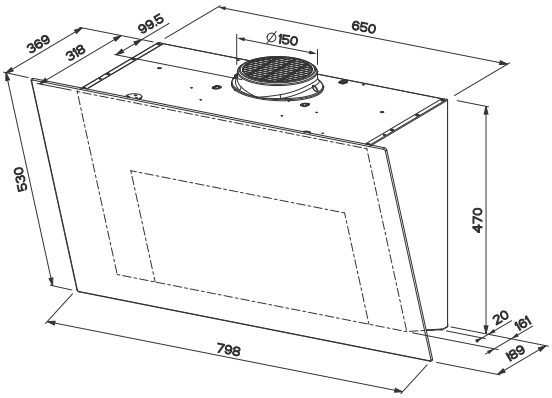
Sometimes it's the details that really bring out a unique personality, as with our True Black. Embellished with a Matt black element that highlights the controls in the front panel and the Faber logo, it's a hood with standout visual appeal and functionality. The body angle lends it enhanced cooking fume extraction, simpler cleaning and maintenance and more light for the hob. The functional side of tone-on-tone.



To be installed at a minimum distance from the hob of 45 cm.

The true essence of black. Enjoy the fullness of minimalism thanks to the hidden touch controls on the glass and a glossy, extremely elegant and seamless surface. But Pure Black isn't just exquisitely refined: the body angle allows enhanced cooking fume extraction, simpler cleaning and maintenance and more light. What's more, it tells you when the grease filter needs cleaning and the odour filter needs replacing through the filter maintenance light. Pure elegance.

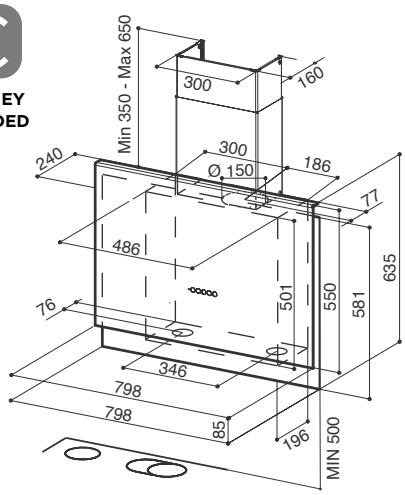
IMPROVING PERFECT IS POSSIBLE!

Faber's famous vertical hood is re-inventing its role as "window over the hob" by adopting the latest Nautilus technology.
The new Nautilus blower not only improves performance but makes Talìka an even more desirable addition to your kitchen by reducing noise.
New comfort from a lightweight, and ultra slim hood now available in new finishes.

Chimney finish:
RAL Design 000 85 00

CHIMNEY INCLUDED



To be installed at a minimum distance from the hob of 50 cm.

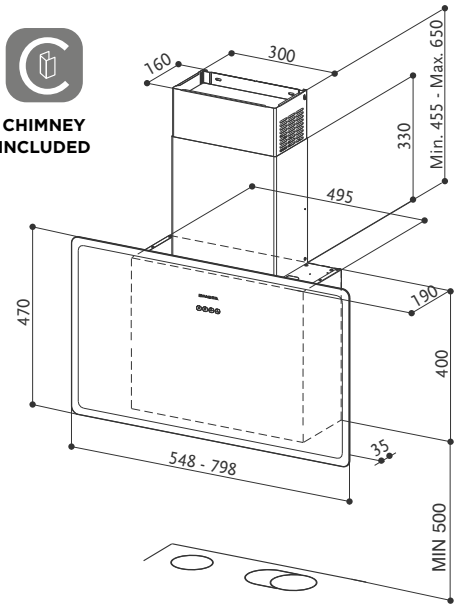
A VERTICAL HOOD WITH THE LATEST NAUTILUS TECHNOLOGY.

Glamour by name and nature, the Glam-Fit hood is defined by a minimal, contemporary style that shows elegance in every detail.

Its clean, essential lines, complemented by a glass surface and an elegant clear surround, add refinement to any kitchen and conceal Faber's exclusive Nautilus technology.

The first ever completely flat, vertical glass hood, Glam-Fit also features an ultra-thin body of only 15 cm. Impressive performance and miserly consumption place it in energy efficiency class A. Glam-Fit comes in two finishes, black and white, both equally striking and typically Faber. Glam-Fit is also available in a "small" 55 cm version.

CHIMNEY INCLUDED



To be installed at a minimum distance from the hob of 50 cm.

ECO FUNCTION:
change of air with minimum consumption and maximum silence.

AS SILENT AND PRECIOUS AS PURE AIR

Onyx-T is the quietest of all T-Shape hoods and guaranteed to surprise which allows an ultra silent mode. The hood's stylish design conceals FABER's exclusive SIL & STILL technology which allows functioning in ultra-silent mode at a sound level of less than 40 dB(A). Maximum comfort, minimum energy consumption and complete freedom to enjoy your home thanks to a special function that continuously exchanges air.
This Eco funcion switches off automatically after 24 hours.
What more can we say?
Faber technology leaves you speechless!

EXCLUSIVE, CONDENSATION-FREE COMFORT

With the Steam Off System, an exclusive Faber technology, in addition to the suction phase, the hood is not only capturing air but even blowing air creating a vortex that helps convey the steam. This stops condensation on the product and on the cabinets. DOUBLE AIR ACTION TO COMPLETELY ELIMINATE CONDENSATION.

STYLE IN EVERY DETAIL, TECHNOLOGY IN EVERY BREATH.

Today, the world is one nation, the whole planet a global village. And the pleasure of country living has reached even the biggest metropolis. Today is the era of Thea. This is a hood that looks beyond the walls of your kitchen, opening up new horizons in design and redefining life in the home. But take nothing for granted! Despite its vintage soul, this hood packs the performance needed for today's industrial world.

FOOD SET

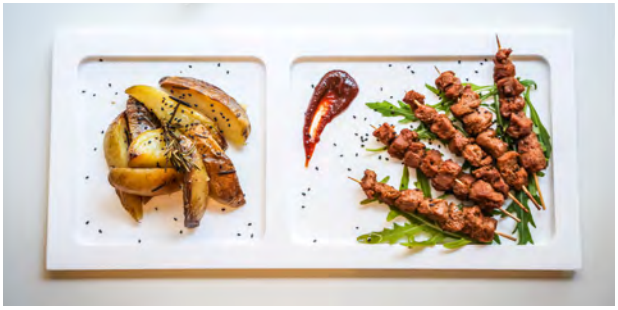
FOOD SET cod. 112.0524.622

This professional food set boasts impressive and exclusive characteristics, including a base made from Krion, produced with the **Krion Eco-Active Solid Technology**™.
This new technology present in Krion™ Eco-Active resides in incorporating a series of activators into the product, specially developed by Krion, which when in contact with any type of light, provide Krion™ Eco-Active with the following new properties: Air purification, Anti-bacteria, Selfcleaning and Elimination of chemical products.
A large number of compounds that are dangerous to our health have been eliminated, such as pesticides present in our surroundings, and especially in the foods we consume.

The base is specially shaped to contain the set's washable food bag and solid wood cutting board. In this set, three practical accessories combine to form a unique solution.
The Thea food set is ideal for the elegant presentation of bread, charcuterie, cheese and fruit, and for use as a simple but chic platter to serve guests at important occasions with rustic aperitifs and finger foods.

FEATURES

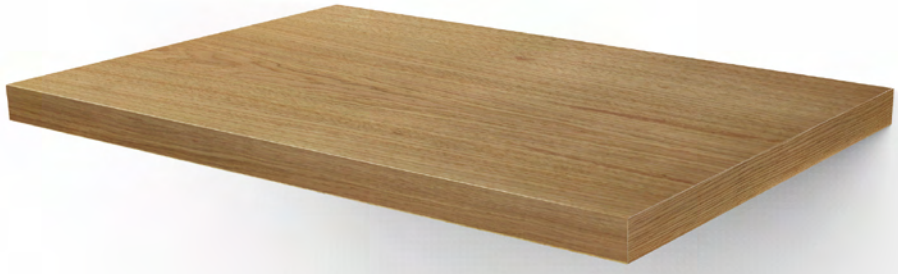
Material: Krion base
Finish: White
Non-porous surface
Anti-bacterial properties
Made from fully recyclable, ecological material
Tough and long-lasting
Dimensions: 440x200x10 mm



MAINTENANCE
Dishwasher washable.
Self-cleaning: liquids and dirt can be cleaned from the surface of the material with greater ease, reducing the use of detergents.
To remove stubborn dirt and surface scratches, clean with a dry, slightly abrasive kitchen sponge.

Material: Solid wood insert
Finish: Durmast

ORDINARY MAINTENANCE: Wite with a damp sponge and dry with a cloth.
SPECIAL MAINTENANCE: To nourish the wood and keep the colour bright, pass a cloth dipped in a few drops of cooking oil.



KIT MENSOLA

SHELF KIT

KIT SHELF cod. 112.0527.474

This wood shelf kit is a great way to add value to your kitchen. Simple and compatible with all styles, this accessory blends great functionality and attractive design.

We recommend combining it with Thea and Thea Island hoods that have frame in the same durmast wood finish.

FEATURES

Material: Wood
Finish: Durmast
Shelf bracket: Internal
Dimensions: 600x400x30 mm

ORDINARY MAINTENANCE: For normal cleaning, simply dust the top with a soft cloth.
SPECIAL MAINTENANCE: Every 2 or 3 months the wooden surface must be polished using a commercially available beeswax product in a colour specific to the type of wood.

NEVER use aggressive detergents or water, as these may damage the surface varnish over time.

Perfect in their every detail, extremely powerful, ideal for all-round kitchen use. Island workstation kitchens take on a central role in the house and in daily family life: cooking instantly develops into personal flair, passion, choice, an intimate, private activity. Island decorative hoods are attractive from all viewpoints, with perfect form in all its features: there is no hidden side or corner not seen by the naked eye. Characterised by symmetry and uniformity, illuminating the centre of our family lives.

UNIQUE PERSONALITY EXPRESSED IN PERFORMANCE.
Some ideas cast new light on everything around them: even colours, fl avours and everyday gestures. In a dull, uniform world they epitomise newness, inspire beauty and establish a new sense of proportion. Chloè XL Island is one of these ideas. Designed to take style to a higher level, Chloè XL Island adds the excitement of broader horizons and new dimensions to your kitchen.

FOOD SET

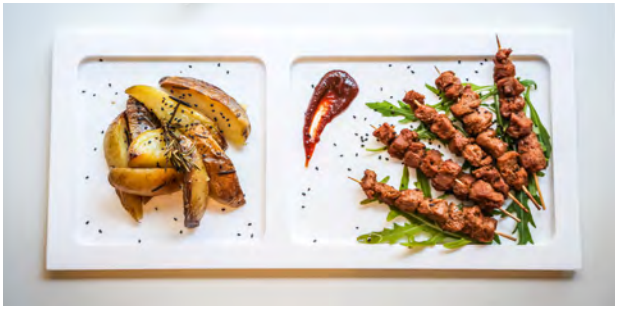
FOOD SET cod. 112.0524.622

This professional food set boasts impressive and exclusive characteristics, including a base made from Krion, produced with the **Krion Eco-Active Solid Technology™**.
This new technology present in Krion™ Eco-Active resides in incorporating a series of activators into the product, specially developed by Krion, which when in contact with any type of light, provide Krion™ Eco-Active with the following new properties: Air purification, Anti-bacteria, Selfcleaning and Elimination of chemical products.
A large number of compounds that are dangerous to our health have been eliminated, such as pesticides present in our surroundings, and especially in the foods we consume.

The base is specially shaped to contain the set's washable food bag and solid wood cutting board. In this set, three practical accessories combine to form a unique solution.
The Thea food set is ideal for the elegant presentation of bread, charcuterie, cheese and fruit, and for use as a simple but chic platter to serve guests at important occasions with rustic aperitifs and finger foods.

FEATURES

Material: Krion base
Finish: White
Non-porous surface
Anti-bacterial properties
Made from fully recyclable, ecological material
Tough and long-lasting
Dimensions: 440x200x10 mm



MAINTENANCE
Dishwasher washable.
Self-cleaning: liquids and dirt can be cleaned from the surface of the material with greater ease, reducing the use of detergents.
To remove stubborn dirt and surface scratches, clean with a dry, slightly abrasive kitchen sponge.

Material: Solid wood insert
Finish: Durmast

ORDINARY MAINTENANCE: Wite with a damp sponge and dry with a cloth.
SPECIAL MAINTENANCE: To nourish the wood and keep the colour bright, pass a cloth dipped in a few drops of cooking oil.

KIT MENSOLA

SHELF KIT

KIT SHELF cod. 112.0527.474

This wood shelf kit is a great way to add value to your kitchen. Simple and compatible with all styles, this accessory blends great functionality and attractive design.

We recommend combining it with Thea and Thea Island hoods that have frame in the same durmast wood finish.

FEATURES

Material: Wood
Finish: Durmast
Shelf bracket: Internal
Dimensions: 600x400x30 mm

ORDINARY MAINTENANCE: For normal cleaning, simply dust the top with a soft cloth.
SPECIAL MAINTENANCE: Every 2 or 3 months the wooden surface must be polished using a commercially available beeswax product in a colour specific to the type of wood.

NEVER use aggressive detergents or water, as these may damage the surface varnish over time.

The Suspended cooker hoods were created to represent the perfect integration of design and wellbeing. The design is absolutely extraordinary and astounds the observer due to its ability to revolutionise the concept of cooker hood lighting, transforming it into a real point of light for the kitchen area. The products are technologically advanced and perfectly shaped, offering the user freedom of movement within the cooking zone. In a simple movement, elegance becomes functionality.

ADVANCED TECHNOLOGY, UNIQUE DESIGN

As beautiful as its name suggests, the Belle hood features a design that is both eye-catching and elegant. Its double panel creates an eff ect reminiscent of the petals of a flower. Available in two refined fi nishes, the original, asymmetrically shaped Belle hood is made even more desirable by Up & Down action and by the technology that has made Faber the number one name in kitchen hoods.

THE CONICAL HOOD. A MODERN CLASSIC

A thin line of stainless steel enriches the top part of this original, conical hood, which is also available with a bottom section in a different finish. The contemporary, essential design of Céline is made even more striking by Up& Down technology. The hood can be raised to the ceiling when not in use and lowered again whenever its extraordinary performance is needed. Céline comes in a choice of matt country grey and warm white.

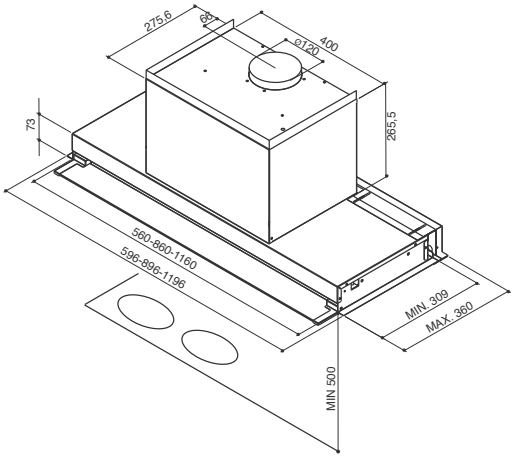
INNOVATIVE TOUCH CONTROLS
Faber's touch controls are located at the front of the hood for instant access. These innovative front-edge controls make hood superbly easy to operate.

EXCLUSIVE,
CONDENSATION-FREE COMFORT

With Steam Off System, the exclusive Faber technology, in addition to the suction phase, the hood also emits air jets that create a vortical motion and acceleration and help to convey and capture the steam.
This puts an end to condensation and its depositing under and around the hood.
DOUBLE AIR ACTION TO COMPLETELY ELIMINATE CONDENSATION.



ILMA TOUCH

To be installed at a minimum distance from the hob of 50 cm.

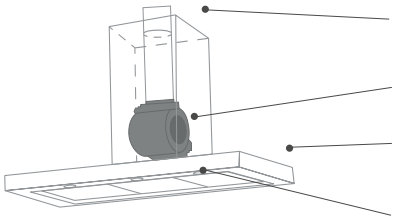
INSTALLATION

ABC
OF THE HOOD

The extraction hood expels fumes and steam out of the kitchen. It is the most effective solution.

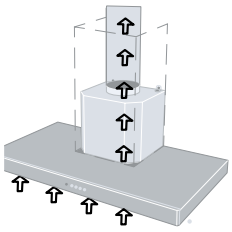


Air ducting system (brings air out)

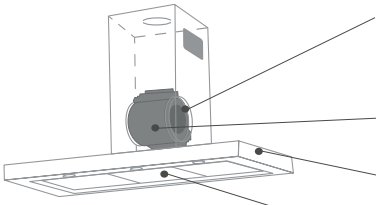
Extraction group (sucks air)

External body

Anti-grease filter (protects the motor from grease damage)



The recycling hood filters the fumes and steam from the air and then returns it to the kitchen.

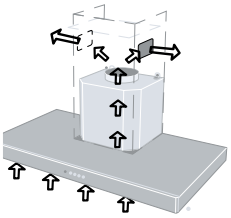


Charcoal filter
(filters the air from the odours - only with filtering hoods)

Extraction group (sucks air)

External body

Anti-grease filter (protects the motor from grease damage)



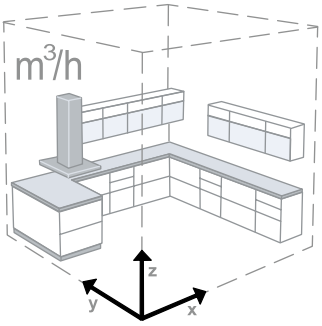
CHOOSE
THE RIGHT HOOD

The necessary extraction capacity is determined by the volume of the kitchen. An effective hood changes the air of the kitchen 10 times per hour. A powerful motor is quieter and uses less energy because it is effective at low speeds.
-A hood does not create noise disturbance if its capacity is sufficient without exceeding 55 dB(A) of sound power.
-A powerful motor can be efficient even at lower, quieter speeds.
1 Fan Handbook - F. Bleier 1998

Example: A 15 m2 kitchen which is 3 m tall requires a hood which aspirates at least 450 m^3/h.
Infact: 15 m^2 x 3 m x 10 = 450 m^3/h
Now consult the performance table found in the product catalogue.
The hood is efficient if an equal or higher capacity value is found in one of the speed columns.

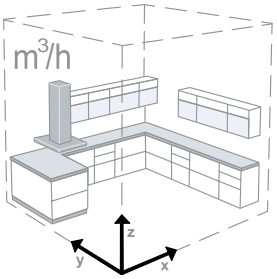
EFFECTIVENESS = kitchen m^2 x kitchen high x 10 changes of air

Speed	1	2	3	4	INT
Air capacity IEC point	110	195	260	313	430
Pressure	-	-	-	-	-
input	30	45	55	70	100
Noise level	48	53	58	62	69

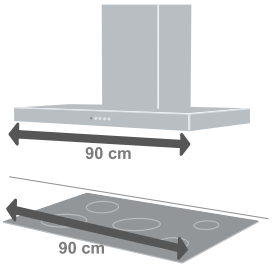


INSTALLATION

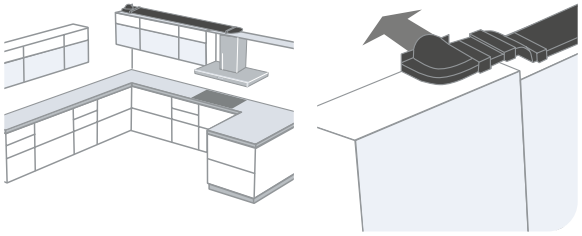
Proper installation begins with an inspection. When choosing a hood, you should know:



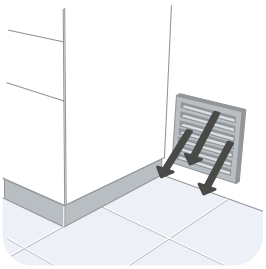
Kitchen volume (which determines the necessary aspiration capacity). See section "Choosing the right hood."



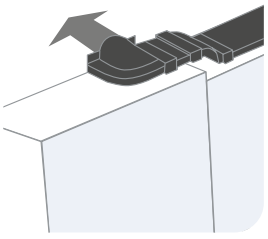
Length of the cooking top (the hood is generally as long as the cooking top area).



The position and distance of the exit hole (very long and very curved right-angled tubes limit hood efficiency).

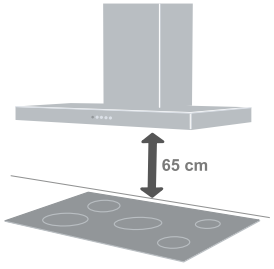


Italian D.M. 37/08 requires two aeration holes which communicate with the external wall in the presence of gas-working equipment.
1. an entrance hole for oxygenising the area, to be made in the lower part of the wall of the room which communicates externally.
2. an exit hole for fume discharge, to be made in the upper part of the wall which communicates externally (or in a chimney flue dedicated exclusively to this use).
If the hood aspirates, the exit hole can be used as a terminal conduit that carries the air outside.



Product integrity
- Check the integrity of the hood upon opening.
- Make sure that the hood is in good conditions and has not been damaged during transport.
- The hood must arrive with its guarantee and instruction manual. Verify the receipt of any optionals (i.e. remote control).
ATTENTION: Do not install the hood if it is damaged. Have it substituted at no charge with a new one, otherwise you may be required to pay for any service assistance. Do not remove any protective films prior to installation.

Installation distance



The hood is to be installed at a minimum distance of 65 cm from the cooking top, except for particular models where is specified in the technical drawing and instructions manual.
ATTENTION: the product guarantee will not be considered valid if this distance is not respected.
The hood may not reach declared performance levels if the distance from the cooking top exceeds 75 cm.
Some vertical-installation models (ex. Cocktail) are to be installed lower. Check the product's technical manual.

Inspection

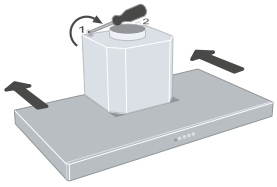
1 - Turn on the motor
2 - Switch on the lights
If the hood is an extraction hood, verify that it is properly connected to the exit tubing.
If the hood is a filtering hood, verify that the charcoal filters have been inserted.

First cleaning

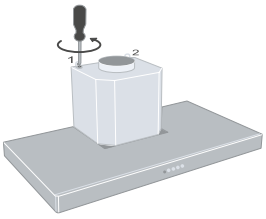
- Remove the protective films
- Remove impurities with a damp sponge and a small amount of neutral soap
- Rinse with a damp cloth
- Dry with a soft cloth. If the hood is in stainless steel, continue with a steel glaze
- You can give stainless steel hoods a protective treatment with the Faber Clin&Clin tissue

EASY CUBE

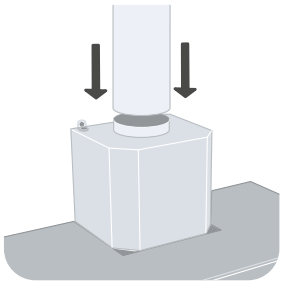
Faber hoods are easy to install because they have EASY CUBE:



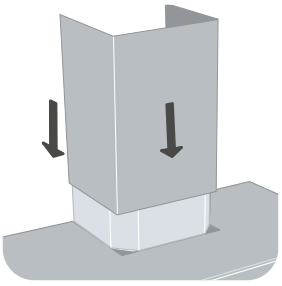
Hang the hood



Align

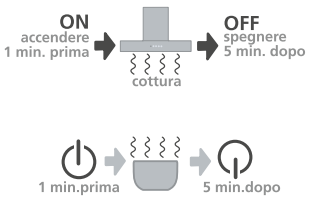


Connect tubing



Insert the chimney

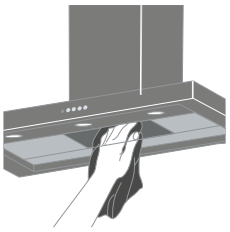
USE AND MAINTENANCE



Switch on the hood a minute before cooking begins to create air flow that channels fumes and steam toward the aspiration surfaces.
If necessary, leave the hood switched on even after cooking is finished so that all steam and odours can be properly aspirated.

- Wash the metal anti-grease filters by hand or in the dishwasher every two months[1]
- Replace synthetic anti-grease filters every two months
- Regular filter maintenance guarantees efficient hood use
ATTENTION: grease deposited on the filters is inflammable: be sure to perform regular maintenance

[1] These intervals of time refer to a regular use of the hood, approximately 3 hours per day

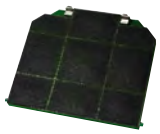


Hood cleaning
- Remove impurities with a damp sponge and a small amount of neutral soap[2]
- Rinse with a damp cloth
- Dry with a soft cloth, if the hood is in stainless steel, follow the steel brushing
- Clean the internal hood conduit once a year

[2] Acid-based cleaning products can damage hood surfaces

ANTI-ODOURS FILTERS

Long lasting

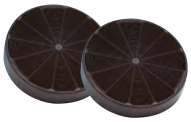


3
YEARS
MAX

Faber has developed a, re-usable active carbon filter. Thanks to the multi-layer technology, the Long Lasting filter further increases filtration efficiency, with the double layer using an initial pre-filtration to capture the largest particles, and a second, more concentrated filtration to guarantee optimal air cleanliness.
The filter can be washed in the dishwasher every 3-4 months1, for a maximum of 3 years and dries at room temperature in a vertical position to allow the water to drain out. Alternatively, it can be placed in an oven at 50°C.

[1] Normal use cooker hood, by around 3 hours per day

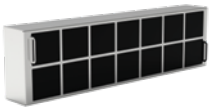
High performance



6
MONTHS
MAX

High-efficiency filter with a highly-concentrated carbon micro-granular structure that can guarantee more than 80% filtration capacity of intake fumes and a duration of up to 6 months, double that of a normal charcoal filter, making for economic savings of more than 20%.

CERAMIC FILTER



Charcoal filter that can be rigenerated in the oven at 200° every 2-3 months and allows to reach high absorption efficiency

CLIN & CLIN CLEANING LINE

Clin&Clin revitalising paste

Removes marks, spots and small rust stains caused by daily use, restoring a natural shine to steel surfaces.

Clin&Clin protective tissues

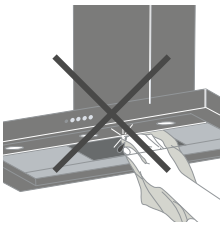
Protect and maintain the beauty of steel surfaces over time. Practical and disposable. To be applied on clean, dry surfaces.

QUALITY AND SAFETY

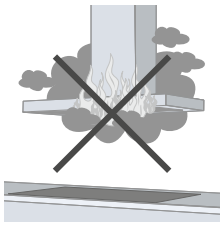
Faber hoods benefit from 60 years of competence in the treatment of kitchen air

- We were the first in the kitchen hood sector to obtain an ISO 9001 company qualitysystem certificate.
- System integrated with Quality, Safety and Environment certified by SGS respecting the ISO 9001:2000, OHSAS 18001 and ISO 14001 norms.
- We have received the SGS Excellence Certificate, the absolute first in the world, number 001.
- All Faber hoods conform to European safety standards (EC mark of conformity), and have also been certified by the IMQ, a reliable, independent organisation further guaranteeing clients on quality (IMQ mark of security).

FABER HOODS ARE DESIGNED FOR SAFETY



Hammered internal edges and tempered glass to avoid risks of cutting.



Thermo-protected motors and self-extinguishing plastics help avoid any risk of fire.
Electronics are solid state, cables and connections are all placed correctly to avoid electric shock or dangerous sparks.

All Faber hoods have undergone safety and performance tests.
Aspiration and noise capacity have been measured according to standard norms:
- EN 61591
- EN 60704-3
unique specifications for surveying kitchen hood performance.
ATTENTION: Comparisons between diff erent brand hoods should be carried out on complete data obtained according to these standards.
The Faber laboratory is NEMKO and IMQ certified.

ASSISTANCE

Faber Technical Assistance is also active in Europe

Check the website www.faberspa.com for phone numbers

- Information about products
- Information about shop branches
- Information about where to purchase spare parts and accessories
- Activation of technical assistance request
- Product or service complaints

The cost of the call may vary depending on the operator used.
Please consult the rates of your operator.

All Faber products are covered with a 2-year "Full guarantee"

"Full guarantee" that covers any compliant defects which might be revealed on the hood over this period.
This guarantee does not cover defects not attributable to Faber such as those caused by erred installation, by any use not compliant with the instructions detailed in the instruction manual or by damage caused during transport.

The performance shown in this catalogue is declared in accordance with the new Code of Conduct signed by the most qualified European manufacturers members of CECED (European Committee of Domestic Equipment Manufacturers), a strict code for transparency which establishes clear rules to measure air flow and noise level for hoods, common to all cooker hoods manufacturers:
• air capacity according to IEC/EN 61591 method
(with the hood fitted using a ducting pipe)
• noise level according to IEC/EN 60704-3 method (sound power)
